CareLens Cymru

November 2025 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2025-11-01 to 2025-11-30
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 47 homes across 18 authorities; 47 latest archived reports provide 430 source PDF pages.

47 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

47 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 10 specific rows: 0 Priority action and 10 Area for improvement. 0 rows are Achieved; 10 have unknown status.

5 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 2,575 extracted finding rows and 282 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Theme	Published rating	Homes	Denominator
Well-being	Excellent	23	23/47
Well-being	Good	24	24/47
Care and Support	Excellent	20	20/47
Care and Support	Good	26	26/47
Care and Support	Requires Improvement	1	1/47
Environment	Excellent	7	7/47
Environment	Good	38	38/47
Environment	Requires Improvement	2	2/47
Leadership and Management	Excellent	14	14/47
Leadership and Management	Good	32	32/47
Leadership and Management	Requires Improvement	1	1/47

Action-table status

Published status	Specific rows
Unknown	10

47 official summaries; 0 labelled theme extracts. 2,575 finding rows and 282 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 47. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	43	24	0	0	0
Safeguarding & incident learning	39	22	2	0	0
Personal plans & risk assessment	47	19	0	0	0
Staffing & recruitment	39	22	1	1	0
Training & supervision	47	29	2	1	0
Leadership & quality assurance	47	46	5	1	0
Rights, choice & independence	47	25	1	0	0
Nutrition & hydration	41	25	2	0	0
Infection prevention	43	31	0	0	0
Environment & fire safety	47	43	1	2	0
Welsh language & culture	47	2	8	0	0
Meaningful activity & community	47	31	0	1	0

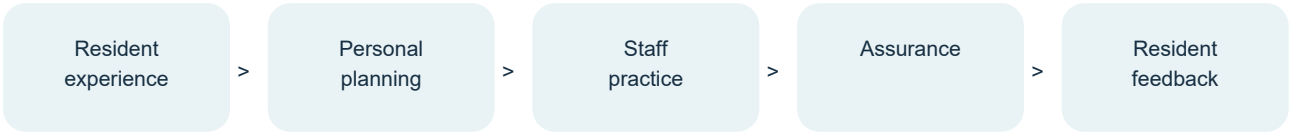

Interpret the patterns

Environment & fire safety: 2 reports have matching table rows; 1 have Improvement wording and 43 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Leadership & quality assurance: 1 reports have matching table rows; 5 have Improvement wording and 46 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Training & supervision: 1 reports have matching table rows; 2 have Improvement wording and 29 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Environment & fire safety

Reports / 47: mentions 47; Positive wording 43; Improvement wording 1; matching action rows 2; Priority category 0. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Professionals who work regularly with the service told us it has a “welcoming and professional environment” and have a good working relationship with the management in terms of implementing people’s support plans.

Llysfaen | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> The provider must ensure that the service that the premises, facilities and equipment are suitable for the service, having regards to the statement of purpose for the service.

The Waverley Care Centre | PDF page 8 | Area for improvement | published status: Unknown | identified: Unknown · Archived page · CIW source

Leadership & quality assurance

Reports / 47: mentions 47; Positive wording 46; Improvement wording 5; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Parkside House is a registered service with robust oversight provided by the RI and is supported by a long-standing manager who is both experienced and registered with Social Care Wales, the workforce regulator.

Parkside House Residential Home | PDF page 8 · Archived page · CIW source

Published table row: verify status and identified date

> People live in a service where the provider does not respond to the RI’s recommendations to improve the quality of the service.

Brynderwen Catre | PDF page 9 | Area for improvement | published status: Unknown | identified: 16/10/25 · Archived page · CIW source

Training & supervision

Reports / 47: mentions 47; Positive wording 29; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Training records show a high level of compliance with almost all care staff having completed mandatory training and just slightly less for the service specific training which includes positive behaviour management; diabetes and autism training.

Caernewydd Farm | PDF page 8 · Archived page · CIW source

Published table row: verify status and identified date

> Without staff being up to date with their training or supervision people are placed at risk of potential harm.

Cwrt Mytton | PDF page 7 | Area for improvement | published status: Unknown | identified: Unknown · Archived page · CIW source

Staffing & recruitment

Reports / 47: mentions 39; Positive wording 22; Improvement wording 1; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> New care staff receive a thorough and effective induction that includes shadow shifts, and this was confirmed by care staff we spoke to, who spoke positively about their experiences of working in the home.

The Elms | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> Without improvements to staffing levels there is a risk to people's social needs being unmet and impacting on their wellbeing.

Queens Court | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/09/25 · Archived page · CIW source

Meaningful activity & community

Reports / 47: mentions 47; Positive wording 31; Improvement wording 0; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Parkside House is a registered service with robust oversight provided by the RI and is supported by a long-standing manager who is both experienced and registered with Social Care Wales, the workforce regulator.

Parkside House Residential Home | PDF page 8 · Archived page · CIW source

Published table row: verify status and identified date

> Without improvements to staffing levels there is a risk to people's social needs being unmet and impacting on their wellbeing.

Queens Court | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/09/25 · Archived page · CIW source

Welsh language & culture

Reports / 47: mentions 47; Positive wording 2; Improvement wording 8; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> A person told us they have a lot of daily choices, they told is in Welsh that the care staff are very good and will take them out for the day if they want, “mae’r staff yn dda iawn hefo fi, eith nhw a mi allan am y dydd os dwi’n dewis.” People have hobbies and collections, and care staff take them shopping for materials.

Tan Y Marian | PDF page 4 · Archived page · CIW source

Nutrition & hydration

Reports / 47: mentions 41; Positive wording 25; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We saw evidence of people being successfully supported to manage pressure areas which had been acquired before becoming a resident, and others gaining weight through good monitoring and provision of nutritious meals.

The Court Care Home | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Others though, were more critical saying the food was not always well presented.

Williamston Nursing Home | PDF page 6 · Archived page · CIW source

Safeguarding & incident learning

Reports / 47: mentions 39; Positive wording 22; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care workers have a good knowledge of their safeguarding responsibilities and confidence that their manager would take the steps necessary to make sure people are safeguarded.

Caernewydd Farm | PDF page 4 · Archived page · CIW source

Weakness prevention: direct improvement wording

> We did identify an isolated incident when the lift breakdown was not reported but we were assured it was repaired within 24 hours.

Belmont Residential Care Home | PDF page 8 · Archived page · CIW source

Rights, choice & independence

Reports / 47: mentions 47; Positive wording 25; Improvement wording 1; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> During our visit, people told us they feel safe and at home, and we observed individuals using the garden and smoking shelter independently, reflecting a comfortable and empowering living space.

Kingsland House Care Home | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Opportunities for people to be involved in reviewing their personal outcomes and having more choice around some aspects of their personal care need to improve.

Foxtroy House | PDF page 2 · Archived page · CIW source

Personal plans & risk assessment

Reports / 47: mentions 47; Positive wording 19; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Peoples progress and personal plans are reviewed at least every month through a highly effective meeting between the person, their relatives or advocate, the manager, RI, key worker and any external professionals involved.

90 Windsor Road | PDF page 5 · Archived page · CIW source

Infection prevention

Reports / 47: mentions 43; Positive wording 31; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The kitchen has been awarded a score of five by the Food Standards Agency which is the highest possible score and suggests standards of cleanliness and hygiene are very good.

Foxtroy House | PDF page 6 · Archived page · CIW source

Medicines management

Reports / 47: mentions 43; Positive wording 24; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Professionals provide regular compliments to the service describing them as “Well organised,” “Professional,” “Helpful” and “The best placement.” Detailed medication records are maintained with effective oversight.

Source register: navigation, not a data dump

All 47 cohort records, including all 47 archived report summaries, are retained in the companion standalone HTML and report-library.json. The HTML register gives publication, issue and visit dates, exact summary kind, summary pages and individual source links. This PDF retains representative source-page links rather than a hundreds-page summary appendix.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3

CIW Crown-material copyright and reuse permission
