CareLens Cymru

October 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-10-01 to 2026-10-31
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 65 homes across 21 authorities; 65 latest archived reports provide 630 source PDF pages.

65 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

65 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 51 specific rows: 25 Priority action and 26 Area for improvement. 0 rows are Achieved; 51 have unknown status.

4 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 3,866 extracted finding rows and 390 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Theme	Published rating	Homes	Denominator
Well-being	Excellent	29	29/65
Well-being	Good	30	30/65
Well-being	Requires Improvement	5	5/65
Well-being	Requires Significant Improvement	1	1/65
Care and Support	Excellent	22	22/65
Care and Support	Good	36	36/65
Care and Support	Requires Improvement	3	3/65
Care and Support	Requires Significant Improvement	4	4/65
Environment	Excellent	13	13/65
Environment	Good	43	43/65
Environment	Requires Improvement	5	5/65
Environment	Requires Significant Improvement	4	4/65
Leadership and Management	Excellent	22	22/65
Leadership and Management	Good	32	32/65
Leadership and Management	Requires Improvement	4	4/65
Leadership and Management	Requires Significant Improvement	7	7/65

Action-table status

Published status	Specific rows
Unknown	51

65 official summaries; 0 labelled theme extracts. 3,866 finding rows and 390 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 65. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	64	39	11	10	3
Safeguarding & incident learning	58	38	2	1	0
Personal plans & risk assessment	64	32	10	5	2
Staffing & recruitment	59	38	12	5	3
Training & supervision	64	42	9	5	2
Leadership & quality assurance	65	65	14	13	6
Rights, choice & independence	65	45	6	5	3
Nutrition & hydration	53	26	5	1	1
Infection prevention	54	40	2	2	1
Environment & fire safety	65	62	14	10	4
Welsh language & culture	65	5	8	0	0
Meaningful activity & community	65	55	5	2	1

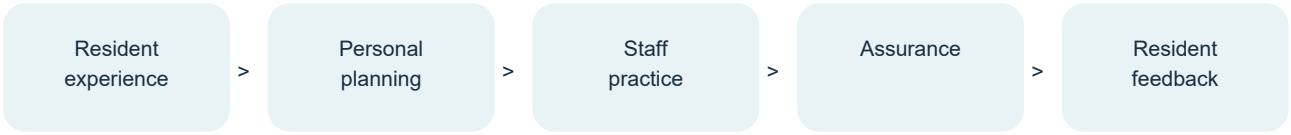

Interpret the patterns

Leadership & quality assurance: 13 reports have matching table rows; 14 have Improvement wording and 65 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 10 reports have matching table rows; 14 have Improvement wording and 62 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Medicines management: 10 reports have matching table rows; 11 have Improvement wording and 39 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Leadership & quality assurance

Reports / 65: mentions 65; Positive wording 65; Improvement wording 14; matching action rows 13; Priority category 6. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People experience positive outcomes because they live in a safe, clean, comfortable and personalised environment where health and safety arrangements and environmental oversight supports their well-being.

Primrose Cottage | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People remain exposed to avoidable risks because the provider's monitoring and quality assurance systems do not effectively identify, assess and address concerns affecting the quality and safety of care.

Castle Court Residential Home | PDF page 8 | Priority action | published status: Unknown | identified: 17/05/24 · Archived page · CIW source

Environment & fire safety

Reports / 65: mentions 65; Positive wording 62; Improvement wording 14; matching action rows 10; Priority category 4. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The environment at Prince Llewellyn Farm is well maintained, with effective systems in place to ensure essential utilities and fire safety equipment are regularly checked, serviced, and remain fit for purpose.

Prince Llewellyn Farm | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider must ensure the service is free from potential hazards to the health and safety of people and to evidence monitoring of the environment to identify deficits and any remedial action required.

Beechlea | PDF page 7 | Area for improvement | published status: Unknown | identified: 16/09/26 · Archived page · CIW source

Medicines management

Reports / 65: mentions 64; Positive wording 39; Improvement wording 11; matching action rows 10; Priority category 3. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care staff work proactively with healthcare professionals to support positive health outcomes whilst encouraging people to develop confidence and independence in managing their medication.

Thompson Court | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People are exposed to the risk of harm because medicines management systems and processes are ineffective. The provider cannot demonstrate that medicines are consistently stored, monitored and administered safely.

The Oaks | PDF page 11 | Priority action | published status: Unknown | identified: 26/08/26 · Archived page · CIW source

Staffing & recruitment

Reports / 65: mentions 59; Positive wording 38; Improvement wording 12; matching action rows 5; Priority category 3. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People can be confident that staff are fully competent in their roles, supported by robust recruitment procedures and comprehensive pre-employment checks to ensure they are suitable to work with vulnerable adults.

The Manor House St.Hilary | PDF page 8 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured the service is effectively led, managed or staffed. Weak workforce governance, poor management oversight and failures in recruitment, deployment and staff monitoring increase the risk of inconsistent care, poor outcomes and avoidable harm.

Balmoral House - Skyline Care Ltd | PDF page 11 | Priority action | published status: Unknown | identified: 11/09/26 · Archived page · CIW source

Personal plans & risk assessment

Reports / 65: mentions 64; Positive wording 32; Improvement wording 10; matching action rows 5; Priority category 2. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Effective assessment, care planning and review processes ensure people remain safe and support remain responsive and centred on achieving positive outcomes, promoting health, wellbeing, dignity and independence.

Fairways Nursing Home | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> People do not consistently receive care and support that reflects their needs, preferences and personal outcomes because personal plans contain insufficient, inaccurate and incomplete information.

Castle Court Residential Home | PDF page 8 | Priority action | published status: Unknown | identified: 22/09/22 · Archived page · CIW source

Training & supervision

Reports / 65: mentions 64; Positive wording 42; Improvement wording 9; matching action rows 5; Priority category 2. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Managers demonstrate a good understanding of areas requiring further development and are progressing actions relating to care planning, infection prevention and control, training and governance.

Clydach Court | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> The provider must ensure the service is provided with sufficient care, competence and skill, having regard to the Statement of Purpose.

Heathfields Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 21/09/26 · Archived page · CIW source

Rights, choice & independence

Reports / 65: mentions 65; Positive wording 45; Improvement wording 6; matching action rows 5; Priority category 3. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Effective assessment, care planning and review processes ensure people remain safe and support remain responsive and centred on achieving positive outcomes, promoting health, wellbeing, dignity and independence.

Fairways Nursing Home | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> oversight increases the risk of avoidable harm and results in an environment that does not consistently promote independence, quality of life, or positive outcomes for people living at the service.

The Oaks | PDF page 12 | Priority action | published status: Unknown | identified: Unknown · Archived page · CIW source

Meaningful activity & community

Reports / 65: mentions 65; Positive wording 55; Improvement wording 5; matching action rows 2; Priority category 1. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Feedback demonstrated people highly value these opportunities, describing positive experiences and meaningful engagement in activities which enrich their lives and contribute to exceptional personal outcomes.

Princes Court | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured they receive safe, person-centred care that meets their needs and preferences. Poor care planning, limited meaningful activities and ineffective risk management increase the risk of reduced wellbeing, inconsistent care and avoidable harm.

Balmoral House - Skyline Care Ltd | PDF page 12 | Priority action | published status: Unknown | identified: 11/09/26 · Archived page · CIW source

Infection prevention

Reports / 65: mentions 54; Positive wording 40; Improvement wording 2; matching action rows 2; Priority category 1. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Effective infection prevention and control (IPC) arrangements are in place, supporting people's health, safety and well-being by reducing the risk of infection and promoting a clean, safe and hygienic environment.

Ty Cysgu | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured they are living in a safe, clean and well-maintained environment. Poor management of environmental risks, fire safety, infection prevention and control, and maintenance issues increase the risk of injury, infection, harm and reduced wellbeing. Ineffective oversight means identified concerns are not consistently addressed in a timely manner, placing people's health, safety and quality of life at risk.

Balmoral House - Skyline Care Ltd | PDF page 11 | Area for improvement | published status: Unknown | identified: 11/09/26 · Archived page · CIW source

Nutrition & hydration

Reports / 65: mentions 53; Positive wording 26; Improvement wording 5; matching action rows 1; Priority category 1. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People living at the service benefit from a high standard of food and dining, they are actively involved in choosing what they would like to eat and told us they really enjoy the meals provided.

Highgrove Residential Home | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> People are at risk of harm because the provider has not ensured that care information is accurate, complete and regularly reviewed. Inadequate oversight of falls, weight management and care records means risks may not be identified, monitored or managed effectively, compromising people's safety and well-being.

The Oaks | PDF page 11 | Priority action | published status: Unknown | identified: 26/08/26 · Archived page · CIW source

Safeguarding & incident learning

Reports / 65: mentions 58; Positive wording 38; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff use information from incidents, reviews and ongoing monitoring to continually strengthen practice, resulting in care and support that is tailored, safe and promotes the best possible outcomes for people.

Treeside | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People's privacy, dignity and confidentiality are not consistently safeguarded because confidential care records were found unsecured in communal areas. This creates a risk of unauthorised access to personal information and means people cannot be assured that their sensitive information is being managed and stored securely.

The Oaks | PDF page 11 | Area for improvement | published status: Unknown | identified: 26/08/26 · Archived page · CIW source

Welsh language & culture

Reports / 65: mentions 65; Positive wording 5; Improvement wording 8; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Positive outcomes are consistently achieved across all aspects of people's wellbeing, including physical health, emotional wellbeing, communication, relationships and Welsh language provision.

Fairways Nursing Home | PDF page 4 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Care and support require significant improvement as people are not consistently supported to achieve positive outcomes due to shortcomings in the dining experience, nutrition, activities provision, staffing arrangements, care planning, risk management and Welsh language provision.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.
