CareLens Cymru

Baseline manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2021-06-30 to 2026-10-30
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 1,046 homes across 22 authorities; 980 latest archived reports provide 9,126 source PDF pages.

979 reports have official CIW summaries and 1 have explicitly labelled theme extracts. 66 cohort homes have no archived report.

858 homes have at least one published theme rating and 188 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 454 specific rows: 98 Priority action and 356 Area for improvement. 112 rows are Achieved; 332 have unknown status.

91 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 54,952 extracted finding rows and 5,879 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Theme	Published rating	Homes	Denominator
Well-being	Excellent	309	309/1046
Well-being	Good	526	526/1046
Well-being	Not published	188	188/1046
Well-being	Requires Improvement	22	22/1046
Well-being	Requires Significant Improvement	1	1/1046
Care and Support	Excellent	212	212/1046
Care and Support	Good	595	595/1046
Care and Support	Not published	188	188/1046
Care and Support	Requires Improvement	40	40/1046
Care and Support	Requires Significant Improvement	11	11/1046
Environment	Excellent	116	116/1046
Environment	Good	696	696/1046
Environment	Not published	188	188/1046
Environment	Requires Improvement	34	34/1046
Environment	Requires Significant Improvement	12	12/1046
Leadership and Management	Excellent	207	207/1046
Leadership and Management	Good	592	592/1046
Leadership and Management	Not published	188	188/1046
Leadership and Management	Requires Improvement	38	38/1046
Leadership and Management	Requires Significant Improvement	21	21/1046

Action-table status

Published status	Specific rows
Unknown	332
Achieved	112
Reviewed	5
New	5

979 official summaries; 1 labelled theme extracts. 54,952 finding rows and 5,879 sections were considered.

Geographic and source coverage

Authority	Cohort homes
Blaenau Gwent	19
Bridgend	39
Caerphilly	61
Cardiff	74
Carmarthenshire	89
Ceredigion	20
Conwy	71
Denbighshire	69
Flintshire	37
Gwynedd	41
Isle of Anglesey	25
Merthyr Tydfil	24
Monmouthshire	29
Neath Port Talbot	54
Newport	39
Pembrokeshire	65
Powys	41
Rhondda Cynon Taf	60
Swansea	85
Torfaen	18
Vale of Glamorgan	47
Wrexham	39

The baseline includes all 1,046 homes, including 66 without a latest archived report. All 980 report summaries are available in the companion HTML and JSON source register; any theme-extract fallback is explicitly labelled, not presented as an official summary.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 980. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	915	512	57	36	8
Safeguarding & incident learning	918	465	35	19	5
Personal plans & risk assessment	965	399	88	71	9
Staffing & recruitment	932	583	48	21	7
Training & supervision	973	628	61	62	13
Leadership & quality assurance	980	964	131	89	27
Rights, choice & independence	968	569	36	28	7
Nutrition & hydration	851	470	23	5	2
Infection prevention	868	622	18	10	2
Environment & fire safety	980	858	80	82	18
Welsh language & culture	980	28	132	1	0
Meaningful activity & community	980	755	44	18	3

Distinct reports mentioning each topic

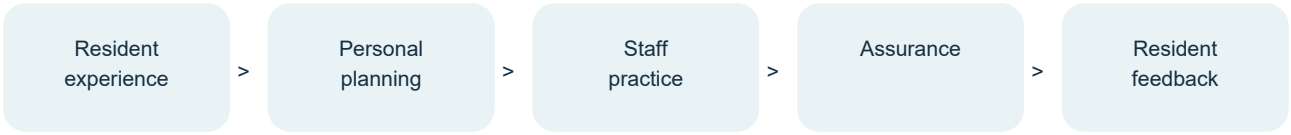

Interpret the patterns

Leadership & quality assurance: 89 reports have matching table rows; 131 have Improvement wording and 964 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 82 reports have matching table rows; 80 have Improvement wording and 858 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Personal plans & risk assessment: 71 reports have matching table rows; 88 have Improvement wording and 399 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Leadership & quality assurance

Reports / 980: mentions 980; Positive wording 964; Improvement wording 131; matching action rows 89; Priority category 27. Overlapping search-label sets.

What to learn and how to test locally

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> They told us; “[manager] is like a breath of fresh air”, the manager and deputy manager are both very approachable” and “communication with the home is very good, the manager is very helpful and conscientious”.

Caemaen Residential Care Home | PDF page 6 · Archived page · CIW source

> Safeguarding records demonstrated appropriate action, partnership working and oversight, while visiting professionals spoke positively about safeguarding practice, risk management and multidisciplinary working.

EMJ & GP Ltd TA Park View Care Home | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Variability in how choice was offered, how people were engaged, and how people and their representatives’ views were listened to meant that people did not always experience the same quality of care and support.

The Willows | PDF page 4 · Archived page · CIW source

> Leadership and management overall, is good but ongoing work is required to ensure there is sufficient nurse presence deployed within the home to monitor and oversee clinical tasks, and this requires improvement.

Hallmark Penylan House Luxury Care Home | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because incidents are not always appropriately escalated or thoroughly investigated, and governance systems do not consistently ensure robust oversight and follow-up.

Elidyr Communities Trust | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/06/26 · Archived page · CIW source

> People remain exposed to avoidable risks because the provider's monitoring and quality assurance systems do not effectively identify, assess and address concerns affecting the quality and safety of care.

Castle Court Residential Home | PDF page 8 | Priority action | published status: Unknown | identified: 17/05/24 · Archived page · CIW source

Environment & fire safety

Reports / 980: mentions 980; Positive wording 858; Improvement wording 80; matching action rows 82; Priority category 18. Overlapping search-label sets.

What to learn and how to test locally

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The provider has established robust systems to minimise infection risks, maintain the premises and equipment, and monitor safety, enabling people to achieve their outcomes in a homely and welcoming environment.

Celynbrook Care Home | PDF page 5 · Archived page · CIW source

> People's well-being is good because their health and well-being is well-maintained; they receive support to achieve their personal outcomes and lead comfortable lives, getting the right care at the right time.

Coed Isaf Nursing Home | PDF page 2 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Although fire risk assessments and servicing records had been completed, inspection findings demonstrated that risks within the environment were not always being identified and managed effectively in practice.

Bod Hyfyrd Care Home | PDF page 6 · Archived page · CIW source

> The fire risk assessment has not been completed by a 'competent person' and does not contain a robust analysis for a high-risk care setting, which limits assurance fire risks are fully understood and managed.

Newton Care Home | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider must ensure the service is free from potential hazards to the health and safety of people and to evidence monitoring of the environment to identify deficits and any remedial action required.

Beechlea | PDF page 7 | Area for improvement | published status: Unknown | identified: 16/09/26 · Archived page · CIW source

> The provider has not ensured effective arrangements are in place to identify and manage health and safety risks. This places people at risk of harm and does not promote or maintain their safety and wellbeing.

Brigadoon Care Home | PDF page 8 | Priority action | published status: Unknown | identified: 30/06/26 · Archived page · CIW source

Personal plans & risk assessment

Reports / 980: mentions 965; Positive wording 399; Improvement wording 88; matching action rows 71; Priority category 9. Overlapping search-label sets.

What to learn and how to test locally

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Effective assessment, care planning and review processes ensure people remain safe and support remain responsive and centred on achieving positive outcomes, promoting health, wellbeing, dignity and independence.

Fairways Nursing Home ¦ PDF page 2 · Archived page · CIW source

> Risk assessments take a proportionate approach to positive risk management, enabling people to maintain as much independence and control as possible whilst ensuring their safety and wellbeing remain protected.

Glencourt | PDF page 3 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Although fire risk assessments and servicing records had been completed, inspection findings demonstrated that risks within the environment were not always being identified and managed effectively in practice.

Bod Hyfyrd Care Home ¦ PDF page 6 · Archived page · CIW source

> People’s personal history, cultural identity, protected characteristics, and significant relationships are usually captured within assessments, but this information is not always carried through into care plans.

Gibraltar House | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> The provider has not been involving the individual and/or their representative in the reviews of personal plans. Two representatives spoken with told us they were not aware of the reviews and had not been involved.

Cartref Ael Y Bryn ¦ PDF page 9 ¦ Area for improvement ¦ published status: Achieved ¦ identified: Unknown · Archived page · CIW source

> The service provider should ensure that changes to care and support needs are updated promptly within personal plans to ensure records remain accurate, current, professional, and accessible to staff (every 3 months).

Maes Teg | PDF page 8 | Area for improvement | published status: Unknown | identified: 29/11/22 · Archived page · CIW source

Training & supervision

Reports / 980: mentions 973; Positive wording 628; Improvement wording 61; matching action rows 62; Priority category 13. Overlapping search-label sets.

What to learn and how to test locally

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One family member told us, “Staff are more knowledgeable than the previous setting; they seem better equipped and trained.” Staff are well supported through regular training and one-to-one supervision sessions.

Ty Gwerthfawr | PDF page 7 · Archived page · CIW source

> Positive feedback from people included “I like it here,” “Nice” and “They look after me.” People are supported with their dietary requirements and staff also receive training around nutrition and food hygiene.

Frederick House | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Training records were not available to provide assurance that staff had completed training relevant to their roles and responsibilities, including training required to support people safely and effectively.

Cartref Care Home Ltd | PDF page 9 · Archived page · CIW source

> However, quality assurance systems had not consistently identified some environmental and safety concerns, indicating a need to strengthen audit effectiveness, training oversight and governance assurance.

Mumbles Nursing Home | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured their care and support needs are consistently met, as staff had not received regular training, supervision and support to enable them to carry out their roles effectively and safely.

Crick Care Home | PDF page 10 | Area for improvement | published status: Unknown | identified: 23/07/26 · Archived page · CIW source

> Not all staff members receive an supervision, appraisal and training at the required frequency and amount. Ensure all staff receive regular supervision, annual appraisals and appropriate levels of training.

Awelon Healthcare Parkview House | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Medicines management

Reports / 980: mentions 915; Positive wording 512; Improvement wording 57; matching action rows 36; Priority category 8. Overlapping search-label sets.

What to learn and how to test locally

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care and support is good as planning is person-centred and responsive, families are actively involved, and safeguarding, medication and infection-prevention arrangements support people's safety and well-being.

No 1 Belle Vue | PDF page 2 · Archived page · CIW source

> Medication is safely managed, with robust systems in place including the use of Medication Administration Records (MAR) and clear PRN protocols outlining the reasons for administration and expected outcomes.

Ty Golff | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> We identified gaps in some staff medication administration signatures and found records relating to 'as required' medicines did not consistently provide sufficient detail regarding decision-making and outcomes.

Heathfields Residential Home | PDF page 5 · Archived page · CIW source

> We found there was limited information within it to help guide care staff to manage and administer medication safely. 'When required' medication is recorded but this is not always in line with current guidance.

Shillings Care | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People are exposed to the risk of harm because medicines management systems and processes are ineffective. The provider cannot demonstrate that medicines are consistently stored, monitored and administered safely.

The Oaks | PDF page 11 | Priority action | published status: Unknown | identified: 26/08/26 · Archived page · CIW source

> People are at risk of harm as medication is not always managed safely. The provider must ensure medication is managed and administered safely in line with national guidance and the service's policy.

Y Plas EMI Care Home | PDF page 8 | Priority action | published status: Unknown | identified: 30/10/25 · Archived page · CIW source

Rights, choice & independence

Reports / 980: mentions 968; Positive wording 569; Improvement wording 36; matching action rows 28; Priority category 7. Overlapping search-label sets.

What to learn and how to test locally

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Wellbeing outcomes for people are excellent as they experience consistent, person-centred care that promotes well-being, independence and safety, resulting in positive outcomes for people living at the service.

Hazeldene | PDF page 2 · Archived page · CIW source

> Families of people told us they get on well with staff and commented “The staff help my relative to have a life and have their independence.” People are protected from harm and neglect to a very high standard.

57 Tir Morfa | PDF page 3 · Archived page · CIW source

Weakness prevention: direct improvement wording

> However, we found well-being requires significant improvement as we found people cannot always exercise choice and control over their lives and do not always experience timely support when they need assistance.

Bod Hyfyrd Care Home | PDF page 2 · Archived page · CIW source

> Variability in how choice was offered, how people were engaged, and how people and their representatives’ views were listened to meant that people did not always experience the same quality of care and support.

The Willows | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> oversight increases the risk of avoidable harm and results in an environment that does not consistently promote independence, quality of life, or positive outcomes for people living at the service.

The Oaks | PDF page 12 | Priority action | published status: Unknown | identified: Unknown · Archived page · CIW source

> People's liberty may be deprived without the necessary authorisations in place to support best interests decisions made around people's accommodation and care and support needs.

Campion Gardens Care Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 17/03/26 · Archived page · CIW source

Staffing & recruitment

Reports / 980: mentions 932; Positive wording 583; Improvement wording 48; matching action rows 21; Priority category 7. Overlapping search-label sets.

What to learn and how to test locally

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Personnel files viewed all contained the relevant documentation for safe and robust recruitment, including reference checks, identification documents and up to date Disclosure and Barring Service (DBS) checks.

Ynystawe Lodge | PDF page 7 · Archived page · CIW source

> Recruitment processes are robust, and the relevant recruitment documentation is obtained including disclosure and barring service (DBS) checks, and all staff are registered with the appropriate professional body.

Haulfryn Care Limited | PDF page 8 · Archived page · CIW source

Weakness prevention: direct improvement wording

> A dependency tool indicates staffing levels are sufficient; however, the staff skill mixes and deployment arrangements are not always effective in meeting people's needs in a timely, person-centred manner.

The Oaks | PDF page 4 · Archived page · CIW source

> New care staff complete a corporate inhouse induction, however many care staff provided feedback to CIW stating the content is not always appropriate or purposeful for those working with care experienced young people.

Forestry House | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> • Supporting and developing staff (Regulation 36) (2) (a)): The service provider must ensure all staff receive an induction appropriate to their role in line with Social Care Wales recommendations.

Hill View Care Home Ltd | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

> People are at risk of not having their outcomes met due to inconsistent staffing levels as specified in the services Statement of Purpose and as per peoples identified level of support.

Spring Meadows (Care) Ltd | PDF page 8 | Area for improvement | published status: Unknown | identified: 02/06/25 · Archived page · CIW source

Safeguarding & incident learning

Reports / 980: mentions 918; Positive wording 465; Improvement wording 35; matching action rows 19; Priority category 5. Overlapping search-label sets.

What to learn and how to test locally

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Safeguarding records demonstrated appropriate action, partnership working and oversight, while visiting professionals spoke positively about safeguarding practice, risk management and multidisciplinary working.

EMJ & GP Ltd TA Park View Care Home | PDF page 5 · Archived page · CIW source

> Care and support is good as planning is person-centred and responsive, families are actively involved, and safeguarding, medication and infection-prevention arrangements support people's safety and well-being.

No 1 Belle Vue | PDF page 2 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Personal plans do not always contain accurate or current information, and updates are not consistently completed following important events such as changes in health, hospital admissions, or safeguarding concerns.

St Anne's Nursing Home | PDF page 5 · Archived page · CIW source

> Risks relating to nutrition, weight loss, falls, safeguarding, infection prevention and control, equipment safety, and environmental health and safety are not consistently identified, monitored, analysed, or addressed.

Priory House Care Home | PDF page 9 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because incidents are not always appropriately escalated or thoroughly investigated, and governance systems do not consistently ensure robust oversight and follow-up.

Elidyr Communities Trust | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/06/26 · Archived page · CIW source

> Outcomes for people require improvement because safeguarding arrangements are not always robust. Safeguarding investigations are not consistently thorough and lack clear recording of decisions and outcomes.

The Cedars Care Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 08/06/26 · Archived page · CIW source

Meaningful activity & community

Reports / 980: mentions 980; Positive wording 755; Improvement wording 44; matching action rows 18; Priority category 3. Overlapping search-label sets.

What to learn and how to test locally

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People receive exceptional care and support because the manager carries out highly effective pre- assessments, gathering detailed information from professionals and developing strong relationships with people.

Plas Garnedd Pentraeth | PDF page 5 · Archived page · CIW source

> Care staff have good relationships with the people they support and can recognise any changes in behaviour quickly to determine whether people are feeling unwell or distressed to act and respond appropriately.

Bakelyn Lodge | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> People's personal history, cultural identity, protected characteristics, and significant relationships are usually captured within assessments, but this information is not always carried through into care plans.

Gibraltar House | PDF page 5 · Archived page · CIW source

> Whilst people have suitably assessed chairs where they spend most of their time, we found this was not always the case when they chose to sit elsewhere, for example to receive visitors in the quiet lounge.

Gwern Alyn Care Home | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People are not consistently supported by adequate numbers of care staff, and the provision of planned, meaningful activities needs improvement to ensure individuals experience positive well-being outcomes.

Maes Y Coed | PDF page 8 | Area for improvement | published status: Unknown | identified: 19/11/25 · Archived page · CIW source

> Not all care staff are registered with the workforce regulator, Social Care Wales, therefore people's well-being may be impacted by having staff work who do not meet the requirements of being 'fit' to work at the service.

Newton Care Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 24/04/26 · Archived page · CIW source

Infection prevention

Reports / 980: mentions 868; Positive wording 622; Improvement wording 18; matching action rows 10; Priority category 2. Overlapping search-label sets.

What to learn and how to test locally

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The provider has established robust systems to minimise infection risks, maintain the premises and equipment, and monitor safety, enabling people to achieve their outcomes in a homely and welcoming environment.

Celynbrook Care Home | PDF page 5 · Archived page · CIW source

> This commitment to safety is further demonstrated by the provider achieving a food hygiene rating of five in its latest inspection, reflecting good standards and effective practices in maintaining food safety.

Cwmbran House | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> However, the file that evidenced systems or checks in place with food preparation was not available on the day of the food hygiene inspection, hence the overall rating stated, major improvement necessary.

Neyland House Care Home | PDF page 5 · Archived page · CIW source

> Risks relating to nutrition, weight loss, falls, safeguarding, infection prevention and control, equipment safety, and environmental health and safety are not consistently identified, monitored, analysed, or addressed.

Priory House Care Home | PDF page 9 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider does not have adequate provision in place for the control of infection and to minimise the spread of infection. Hygiene and infection control risks were evident during inspection.

Hafod Mawddach | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

> Aspects of care and support require improvement. People may be exposed to increased risk of infection because personal care is either not delivered or not facilitated in line with their care plans.

Ty Bradwen | PDF page 7 | Area for improvement | published status: Unknown | identified: 04/11/25 · Archived page · CIW source

Nutrition & hydration

Reports / 980: mentions 851; Positive wording 470; Improvement wording 23; matching action rows 5; Priority category 2. Overlapping search-label sets.

What to learn and how to test locally

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People were positive about the support they receive and we observed individuals being consistently encouraged to make choices in line with their preferences, including decisions about meals, drinks and snacks.

College Fields Nursing Home | PDF page 4 · Archived page · CIW source

> This commitment to safety is further demonstrated by the provider achieving a food hygiene rating of five in its latest inspection, reflecting good standards and effective practices in maintaining food safety.

Cwmbran House | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> However, the file that evidenced systems or checks in place with food preparation was not available on the day of the food hygiene inspection, hence the overall rating stated, major improvement necessary.

Neyland House Care Home | PDF page 5 · Archived page · CIW source

> Although people reported feeling safe and spoke positively about staff, food, and choice, daily care recording is inconsistent, with gaps that do not always demonstrate timely or effective care delivery.

Moorland Home | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> Risks relating to nutrition, weight loss, falls, safeguarding and the environment were not consistently identified, monitored, analysed or addressed, resulting in people not always receiving a service that promotes choice, independence, wellbeing and safety.

Priory House Care Home | PDF page 10 | Priority action | published status: Unknown | identified: 07/07/26 · Archived page · CIW source

> People are at risk of harm because the provider has not ensured that care information is accurate, complete and regularly reviewed. Inadequate oversight of falls, weight management and care records means risks may not be identified, monitored or managed effectively, compromising people's safety and well-being.

The Oaks | PDF page 11 | Priority action | published status: Unknown | identified: 26/08/26 · Archived page · CIW source

Welsh language & culture

Reports / 980: mentions 980; Positive wording 28; Improvement wording 132; matching action rows 1; Priority category 0. Overlapping search-label sets.

What to learn and how to test locally

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One person felt highly motivated by the new manager in planning “a good year ahead with lots of adventures.” The promotion of Welsh language and culture is integrated through bilingual documentation.

Ty Newydd ¦ PDF page 3 · Archived page · CIW source

> Positive outcomes are consistently achieved across all aspects of people's wellbeing, including physical health, emotional wellbeing, communication, relationships and Welsh language provision.

Fairways Nursing Home | PDF page 4 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Care and support require significant improvement as people are not consistently supported to achieve positive outcomes due to shortcomings in the dining experience, nutrition, activities provision, staffing arrangements, care planning, risk management and Welsh language provision.

Balmoral House - Skyline Care Ltd ¦ PDF page 2 · Archived page · CIW source

> Information is not always available in Welsh, but currently, people living here do not choose to use the Welsh language.

Garfield | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Policies require revision to reflect Welsh legislation and guidance, and further addition of procedures for staff to follow.

Woodland Lodge | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Source register: navigation, not a data dump

All 1,046 cohort records, including all 980 archived report summaries, are retained in the companion standalone HTML and report-library.json. The HTML register gives publication, issue and visit dates, exact summary kind, summary pages and individual source links. This PDF retains representative source-page links rather than a hundreds-page summary appendix.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3
