CareLens Cymru

Inspection evidence. Better care.

February 2025 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2025-02-01 to 2025-02-28
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 22 homes across 14 authorities; 22 latest archived reports provide 219 source PDF pages.

22 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

0 homes have at least one published theme rating and 22 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 16 specific rows: 2 Priority action and 14 Area for improvement. 14 rows are Achieved; 0 have unknown status.

3 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 1,241 extracted finding rows and 132 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

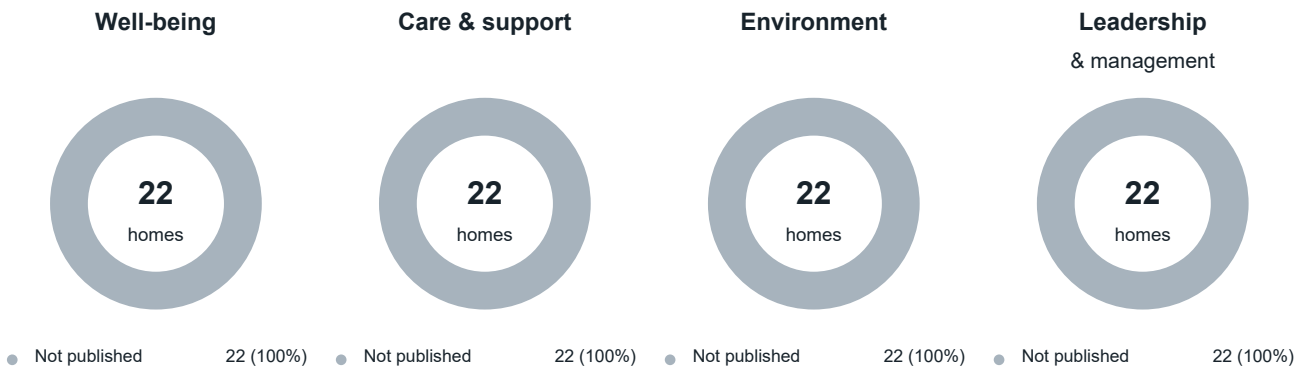

How to use this report

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Theme	Published rating	Homes	Denominator
Well-being	Not published	22	22/22
Care and Support	Not published	22	22/22
Environment	Not published	22	22/22
Leadership and Management	Not published	22	22/22

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Achieved	14
New	2

22 official summaries; 0 labelled theme extracts. 1,241 finding rows and 132 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 22. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	21	9	0	3	0
Safeguarding & incident learning	21	6	1	1	0
Personal plans & risk assessment	22	3	0	0	0
Staffing & recruitment	22	10	0	0	0
Training & supervision	22	14	2	4	0
Leadership & quality assurance	22	22	1	1	0
Rights, choice & independence	22	10	0	2	0
Nutrition & hydration	22	11	0	0	0
Infection prevention	21	14	0	1	0
Environment & fire safety	22	12	0	3	2
Welsh language & culture	22	1	0	0	0
Meaningful activity & community	22	15	0	0	0

Distinct reports mentioning each topic

Interpret the patterns

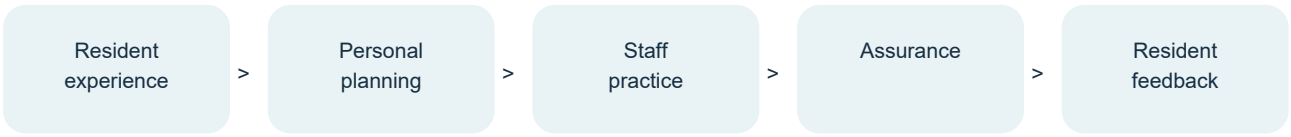

Training & supervision: 4 reports have matching table rows; 2 have Improvement wording and 14 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 3 reports have matching table rows; 0 have Improvement wording and 12 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Medicines management: 3 reports have matching table rows; 0 have Improvement wording and 9 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

CIW / Welsh Government | Crown copyright / Open Government Licence

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Training & supervision

Reports / 22: mentions 22; Positive wording 14; Improvement wording 2; matching action rows 4; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care workers and senior staff are well supported in their roles and receive suitable training to ensure they have the necessary skills to carry out their roles successfully.

The Glen | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> Quarterly supervisions and annual appraisals are not being completed. The service provider must complete supervisions on a quarterly basis and appraisals on an annual basis.

Elm Villa | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Environment & fire safety

Reports / 22: mentions 22; Positive wording 12; Improvement wording 0; matching action rows 3; Priority category 2. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One visiting health professional told us, “They’re very good, they always try to promote independence,” and we saw the service has provided specific exercise equipment which helps people to build strength.

Morel Court | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> Health and Safety risks are not adequately identified and managed, which places people at risk of harm. Ensure all health and safety risks within the environment are identified and appropriately managed.

Hafod Mawddach | PDF page 8 | Priority action | published status: Achieved | identified: Unknown · Archived page · CIW source

Medicines management

Reports / 22: mentions 21; Positive wording 9; Improvement wording 0; matching action rows 3; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Robust arrangements are in place for storing, ordering, and administering medication which is stored securely and can only be accessed by authorised staff.

Anwen Care Home | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> People's dignity, and therefore well-being, is compromised by unsuitable dining experience and medication administration support processes in the home. The provider must change this so people are afforded a better dining and medication administration experience.

Plas-y-Mor Nursing Home | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Rights, choice & independence

Reports / 22: mentions 22; Positive wording 10; Improvement wording 0; matching action rows 2; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One visiting health professional told us, “They’re very good, they always try to promote independence,” and we saw the service has provided specific exercise equipment which helps people to build strength.

Morel Court | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

People's dignity, and therefore well-being, is compromised by unsuitable dining experience and medication administration support processes in the home. The provider must change this so people are afforded a better dining and medication administration experience.

Plas-y-Mor Nursing Home | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Leadership & quality assurance

Reports / 22: mentions 22; Positive wording 22; Improvement wording 1; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The RI ensures good oversight of the service throughout the year and completes a quality- of-care review report every six months to feedback their findings of audits and other checks and measures carried out.

Park View | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> There is no system of monitoring and auditing in place which supports a planned maintenance schedule and renewal programme for the fabric and decoration of the premises. The provider must ensure this is in place by the next inspection.

Plas-y-Mor Nursing Home | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Safeguarding & incident learning

Reports / 22: mentions 21; Positive wording 6; Improvement wording 1; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff receive safeguarding training and those spoken with showed good knowledge of their responsibilities around this.

London House | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider must ensure all persons working at the service receive safeguarding training

Plas Crigyll Residential Care Home | PDF page 10 | Area for improvement | published status: New | identified: Unknown · Archived page · CIW source

Infection prevention

Reports / 22: mentions 21; Positive wording 14; Improvement wording 0; matching action rows 1; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The Food Standards Agency completed an inspection in November 2024 and awarded a food hygiene rating of five which means the standards are very good.

White Rose Care Home | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider does not have adequate provision in place for the control of infection and to minimise the spread of infection. Hygiene and infection control risks were evident during inspection.

Hafod Mawddach | PDF page 9 | Area for improvement | published status: Achieved | identified: Unknown · Archived page · CIW source

Meaningful activity & community

Reports / 22: mentions 22; Positive wording 15; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> They are good with people and respectful towards them.” People receive a good standard of care and support from a well-trained and supported care staff team, who are registered with Social Care Wales, the workforce regulator.

Sunnybank Dementia Residential Home | PDF page 5 · Archived page · CIW source

Personal plans & risk assessment

Reports / 22: mentions 22; Positive wording 3; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> They are detailed and contain individual outcomes, likes, dislikes, preferences with robust risk assessments are in place and regularly reviewed.

Elm Villa | PDF page 5 · Archived page · CIW source

Nutrition & hydration

Reports / 22: mentions 22; Positive wording 11; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Some people have positive relationships with their family and friends and keep in contact with them in various ways including phone calls, visits, meals out and overnight stays.

Plas-y-Mor Nursing Home | PDF page 5 · Archived page · CIW source

Staffing & recruitment

Reports / 22: mentions 22; Positive wording 10; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Recruitment processes are robust, and the relevant recruitment documentation is obtained including disclosure and barring service (DBS) checks, and all staff are registered with the appropriate professional body.

Walshaw Lodge | PDF page 7 · Archived page · CIW source

Welsh language & culture

Reports / 22: mentions 22; Positive wording 1; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> A person told us in Welsh, they are fine, and the service is good, “dwi’n iawn, mae’n dda yma”.

Hafod Mawddach | PDF page 4 · Archived page · CIW source

Source register: navigation, not a data dump

All 22 cohort records, including all 22 archived report summaries, are retained in the companion standalone HTML and report-library.json. The HTML register gives publication, issue and visit dates, exact summary kind, summary pages and individual source links. This PDF retains representative source-page links rather than a hundreds-page summary appendix.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.
