CareLens Cymru

Inspection evidence. Better care.

September 2025 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2025-09-01 to 2025-09-30
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 44 homes across 18 authorities; 44 latest archived reports provide 393 source PDF pages.

44 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

44 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 8 specific rows: 0 Priority action and 8 Area for improvement. 0 rows are Achieved; 8 have unknown status.

3 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 2,370 extracted finding rows and 264 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

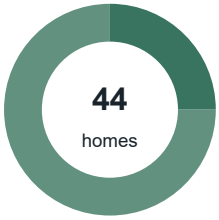

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

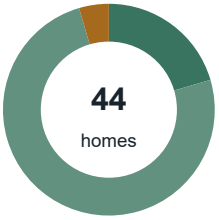

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

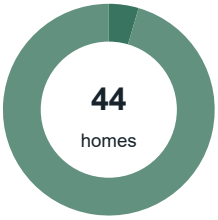

- Excellent 11 (25%)
- Good 33 (75%)

Care & support

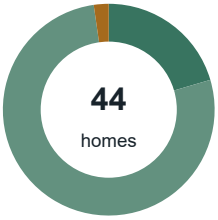

- Excellent 9 (20%)
- Good 33 (75%)
- Requires improv. 2 (5%)

Environment

- Excellent 2 (5%)
- Good 42 (95%)

Leadership & management

- Excellent 9 (20%)
- Good 34 (77%)
- Requires improv. 1 (2%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	11	11/44
Well-being	Good	33	33/44
Care and Support	Excellent	9	9/44
Care and Support	Good	33	33/44
Care and Support	Requires Improvement	2	2/44
Environment	Excellent	2	2/44
Environment	Good	42	42/44
Leadership and Management	Excellent	9	9/44
Leadership and Management	Good	34	34/44
Leadership and Management	Requires Improvement	1	1/44

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	8

44 official summaries; 0 labelled theme extracts. 2,370 finding rows and 264 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 44. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	42	28	0	0	0
Safeguarding & incident learning	38	19	2	0	0
Personal plans & risk assessment	43	16	2	1	0
Staffing & recruitment	44	23	0	1	0
Training & supervision	44	30	2	0	0
Leadership & quality assurance	44	44	5	2	0
Rights, choice & independence	43	24	0	0	0
Nutrition & hydration	38	16	1	0	0
Infection prevention	38	29	0	0	0
Environment & fire safety	44	36	2	1	0
Welsh language & culture	44	2	12	0	0
Meaningful activity & community	44	32	3	0	0

Distinct reports mentioning each topic

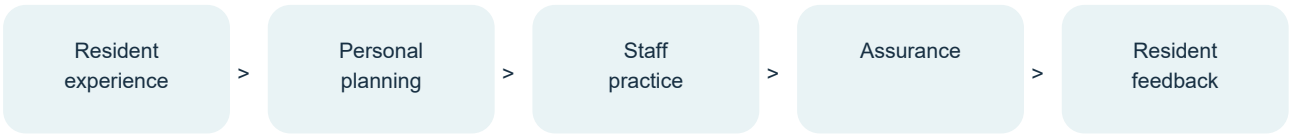

Interpret the patterns

Leadership & quality assurance: 2 reports have matching table rows; 5 have Improvement wording and 44 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Personal plans & risk assessment: 1 reports have matching table rows; 2 have Improvement wording and 16 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 1 reports have matching table rows; 2 have Improvement wording and 36 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Leadership & quality assurance

Reports / 44: mentions 44; Positive wording 44; Improvement wording 5; matching action rows 2; Priority category 0. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The Responsible Individual (RI), who is also the registered manager, visits the service regularly, has a good working relationship with senior and support staff, and has effective oversight of service provision.

Alexandra House Residential Denbigh | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> People are at a risk of harm to their physical and mental well-being if administrative and reviewing systems are not improved. Robust storage of documents and improved oversight of paperwork will ensure people are kept safe within the service.

Ty Anwen | PDF page 7 | Area for improvement | published status: Unknown | identified: 30/07/25 · Archived page · CIW source

Personal plans & risk assessment

Reports / 44: mentions 43; Positive wording 16; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care workers know people well, both because of the time they spend with them and the comprehensive personal plans which are used to inform and drive good care.

Bush House Pembroke Limited | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> People are at risk of not having there needs met due to the lack of information within the persons personal plan.

Mardy Park Resource Centre | PDF page 8 | Area for improvement | published status: Unknown | identified: 31/07/25 · Archived page · CIW source

Environment & fire safety

Reports / 44: mentions 44; Positive wording 36; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> A ‘Spa’ treatment room has been decorated to a high standard and equipment such as a pedicure chair, manicure table and hairdressing equipment means people can enjoy physical treatments to benefit their overall wellbeing.

Cysgod Y Gaer | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> Action is not always taken in a timely manner to reduce identified health and safety risks within the environment. Ensure action is taken promptly to address and reduce known health and safety risks, to protect people so far as possible from harm.

Plas Garnedd Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 16/07/25 · Archived page · CIW source

Staffing & recruitment

Reports / 44: mentions 44; Positive wording 23; Improvement wording 0; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Robust recruitment processes are in place, so people can be assured the care workers who support them have been assessed as being of suitable character for their roles.

Plas Garnedd Residential Home | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People may not always achieve good outcomes because safe recruitment and vetting procedures for new staff are not consistently applied and require strengthening.

Ty Brian | PDF page 7 | Area for improvement | published status: Unknown | identified: 19/06/25 · Archived page · CIW source

Welsh language & culture

Reports / 44: mentions 44; Positive wording 2; Improvement wording 12; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People experience positive wellbeing because of the promotion and integration of the Welsh language within the service.

Cysgod Y Gaer | PDF page 3 · Archived page · CIW source

Meaningful activity & community

Reports / 44: mentions 44; Positive wording 32; Improvement wording 3; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> During this inspection, the rating awarded for Wellbeing is ‘Good’, as people are involved in a range of meaningful activities, their views and suggestions are sought and valued, and people tell us they feel safe.

Ty Aberdafen | PDF page 2 · Archived page · CIW source

Weakness prevention: direct improvement wording

> We discussed with the manager the need to ensure a list of activities is displayed prominently and there is a plan for activities to guide staff.

Ty Victoria Nursing Homes | PDF page 4 · Archived page · CIW source

Safeguarding & incident learning

Reports / 44: mentions 38; Positive wording 19; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff demonstrate a good understanding of their roles and responsibilities, including safeguarding and infection control, and report feeling confident in performing their duties safely and effectively.

Fern Bungalow Care Home | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> We also discussed the need to ensure robust oversight of staff supervision and safeguarding.

Plas Newydd Care Home | PDF page 6 · Archived page · CIW source

Training & supervision

Reports / 44: mentions 44; Positive wording 30; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care workers speak positively about the training and the regular one-to-one supervision and support they receive, they told us “we do loads of training, both eLearning and face to face.

Ty Aberdafen | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Training and development for care staff requires improvement to ensure staff complete training which aligns with the identified needs of people living at the service.

Cysgod Y Gaer | PDF page 2 · Archived page · CIW source

Nutrition & hydration

Reports / 44: mentions 38; Positive wording 16; Improvement wording 1; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One person told us “The food is good; I get plenty and I get choice.” The weather during the inspection was hot and we saw people being offered and eating ice cream and ice lollies to help keep them cool.

Phoenix House | PDF page 4 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Care staff make electronic records of the care they provide, although these are not always completed in a timely way and often vary in detail, particularly in relation to food and fluid monitoring.

Heatherslade residential home | PDF page 4 · Archived page · CIW source

Infection prevention

Reports / 44: mentions 38; Positive wording 29; Improvement wording 0; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff demonstrate a good understanding of their roles and responsibilities, including safeguarding and infection control, and report feeling confident in performing their duties safely and effectively.

Fern Bungalow Care Home | PDF page 6 · Archived page · CIW source

Medicines management

Reports / 44: mentions 42; Positive wording 28; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Good procedures are in place for medication management, with the consistent staff team knowing people well and able to recognise signs of ill health to seek appropriate professional advice.

The Paddocks | PDF page 4 · Archived page · CIW source

Rights, choice & independence

Reports / 44: mentions 43; Positive wording 24; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Families of people told us they get on well with staff and commented “The staff help my relative to have a life and have their independence.” People are protected from harm and neglect to a very high standard.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.
