CareLens Cymru

Inspection evidence. Better care.

January 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-01-01 to 2026-01-31
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 31 homes across 15 authorities; 31 latest archived reports provide 279 source PDF pages.

31 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

30 homes have at least one published theme rating and 1 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 20 specific rows: 0 Priority action and 20 Area for improvement. 0 rows are Achieved; 20 have unknown status.

6 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 1,746 extracted finding rows and 186 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

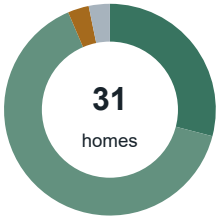

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

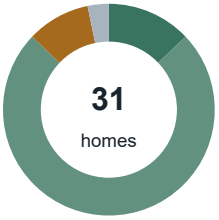

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

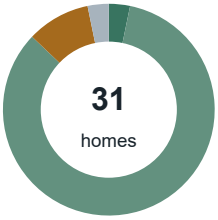

- Excellent 9 (29%)
- Good 20 (65%)
- Requires improv. 1 (3%)
- Not published 1 (3%)

Care & support

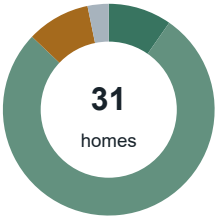

- Excellent 4 (13%)
- Good 23 (74%)
- Requires improv. 3 (10%)
- Not published 1 (3%)

Environment

- Excellent 1 (3%)
- Good 26 (84%)
- Requires improv. 3 (10%)
- Not published 1 (3%)

Leadership & management

- Excellent 3 (10%)
- Good 24 (77%)
- Requires improv. 3 (10%)
- Not published 1 (3%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	9	9/31
Well-being	Good	20	20/31
Well-being	Not published	1	1/31
Well-being	Requires Improvement	1	1/31
Care and Support	Excellent	4	4/31
Care and Support	Good	23	23/31
Care and Support	Not published	1	1/31
Care and Support	Requires Improvement	3	3/31
Environment	Excellent	1	1/31
Environment	Good	26	26/31
Environment	Not published	1	1/31
Environment	Requires Improvement	3	3/31
Leadership and Management	Excellent	3	3/31
Leadership and Management	Good	24	24/31
Leadership and Management	Not published	1	1/31

Theme	Published rating	Homes	Denominator
Leadership and Management	Requires Improvement	3	3/31

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	20

31 official summaries; 0 labelled theme extracts. 1,746 finding rows and 186 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 31. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	31	16	4	1	0
Safeguarding & incident learning	30	11	2	2	0
Personal plans & risk assessment	31	14	3	2	0
Staffing & recruitment	30	17	1	0	0
Training & supervision	31	19	1	1	0
Leadership & quality assurance	31	28	6	3	0
Rights, choice & independence	31	17	0	1	0
Nutrition & hydration	29	19	0	0	0
Infection prevention	31	21	0	0	0
Environment & fire safety	31	29	2	4	0
Welsh language & culture	31	1	2	0	0
Meaningful activity & community	31	23	0	0	0

Distinct reports mentioning each topic

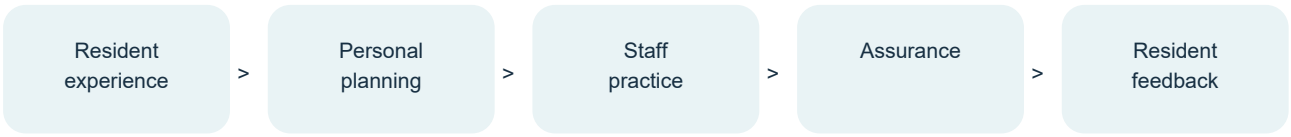

Interpret the patterns

Environment & fire safety: 4 reports have matching table rows; 2 have Improvement wording and 29 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Leadership & quality assurance: 3 reports have matching table rows; 6 have Improvement wording and 28 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Personal plans & risk assessment: 2 reports have matching table rows; 3 have Improvement wording and 14 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Environment & fire safety

Reports / 31: mentions 31; Positive wording 29; Improvement wording 2; matching action rows 4; Priority category 0. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People's well-being is good because their health and well-being is well-maintained; they receive support to achieve their personal outcomes and lead comfortable lives, getting the right care at the right time.

Coed Isaf Nursing Home | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> People can not be confident that hazards in the environment which present risks to their health and safety, are reduced as far as reasonable practicable.

Central Surgery Nursing Home Limited | PDF page 8 | Area for improvement | published status: Unknown | identified: 26/11/25 · Archived page · CIW source

Leadership & quality assurance

Reports / 31: mentions 31; Positive wording 28; Improvement wording 6; matching action rows 3; Priority category 0. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The provider, who is also the proposed responsible individual for the service, is present on a very regular basis, supporting daily operations and ensuring systems and procedures are being effectively implemented.

Plas Dyffryn Residential Home | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> There has been a lack of oversight and support to management since September 2022. Whilst this is not currently impacting on the care provided to people, an ongoing lack of monitoring of the service is posing a risk to their wellbeing.

The Old Vicarage Llangollen | PDF page 8 | Area for improvement | published status: Unknown | identified: 15/06/23 · Archived page · CIW source

Personal plans & risk assessment

Reports / 31: mentions 31; Positive wording 14; Improvement wording 3; matching action rows 2; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> A relative fedback “I receive regular care plans and communication is always good when I visit.” A relative told us “Staff are wonderful.” Resident’s meetings take place regularly and records are kept and acted upon.

Bronafallen Care Home Ltd | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People's personal plans should accurately reflect their needs, and should be consistently updated when needs change.

Plas y Garn | PDF page 7 | Area for improvement | published status: Unknown | identified: 29/10/25 · Archived page · CIW source

Safeguarding & incident learning

Reports / 31: mentions 30; Positive wording 11; Improvement wording 2; matching action rows 2; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care and support are delivered to an exceptionally high standard, with robust safeguarding and collaborative working ensuring people remain safe while achieving positive outcomes.

Cwmbran House | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> People could be placed at risk of harm if appropriate notifications are not made to relevant regulatory bodies and statutory agencies.

Priory Residential and Nursing Home | PDF page 9 | Area for improvement | published status: Unknown | identified: 13/04/22 · Archived page · CIW source

Medicines management

Reports / 31: mentions 31; Positive wording 16; Improvement wording 4; matching action rows 1; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care staff support people with positive risk taking to help them maintain as much independence as possible, such as managing their own medication.

The Old Vicarage Llangollen | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> Medication management should be robust to ensure people are as healthy as possible.

Plas y Garn | PDF page 7 | Area for improvement | published status: Unknown | identified: 11/06/24 · Archived page · CIW source

Training & supervision

Reports / 31: mentions 31; Positive wording 19; Improvement wording 1; matching action rows 1; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Positive feedback from people included “I like it here,” “Nice” and “They look after me.” People are supported with their dietary requirements and staff also receive training around nutrition and food hygiene.

Frederick House | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People are at risk because the provider has not made sure ancillary staff receive the training needed to support their understanding of their responsibilities to keep people safe. This means ancillary staff may not act appropriately to protect people from harm.

Pen y Bryn Residential Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 02/12/25 · Archived page · CIW source

Rights, choice & independence

Reports / 31: mentions 31; Positive wording 17; Improvement wording 0; matching action rows 1; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> This approach demonstrates care staff know people well and understand the importance of maintaining people's independence and skills whilst supporting them to have good nutrition and well-being.

Pen y Bryn Residential Home | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> The issues identified with the kitchen pose a potential health and safety risk to staff and may impact on the the number of choices available to people about what they want to eat. People do not currently benefit from an accessible and pleasant outside space where they can relax and enjoy the fresh air. This could have a negative impact on their overall enjoyment and wellbeing.

Plas Ogwen | PDF page 8 | Area for improvement | published status: Unknown | identified: 06/11/25 · Archived page · CIW source

Welsh language & culture

Reports / 31: mentions 31; Positive wording 1; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The establishment of a Welsh Language Working Group demonstrates very good commitment to the Welsh Active Offer and cultural inclusivity.

Cwmbran House | PDF page 3 · Archived page · CIW source

Staffing & recruitment

Reports / 31: mentions 30; Positive wording 17; Improvement wording 1; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Leadership and management of the service is good because there is effective oversight of the service and care staff are safely recruited, supported and trained in their roles.

Carr Holm | PDF page 2 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Additionally, agency staff do not consistently receive robust induction, which may result in care being delivered by individuals unfamiliar with residents' needs.

Plas y Garn | PDF page 4 · Archived page · CIW source

Meaningful activity & community

Reports / 31: mentions 31; Positive wording 23; Improvement wording 0; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care staff build positive relationships with the people who live in the home and one person who was initially struggled with the move to the home commented "I have accidentally ended up in the best place for me".

Ty Gobaith | PDF page 4 · Archived page · CIW source

Infection prevention

Reports / 31: mentions 31; Positive wording 21; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> This commitment to safety is further demonstrated by the provider achieving a food hygiene rating of five in its latest inspection, reflecting good standards and effective practices in maintaining food safety.

Cwmbran House | PDF page 5 · Archived page · CIW source

Nutrition & hydration

Reports / 31: mentions 29; Positive wording 19; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> This commitment to safety is further demonstrated by the provider achieving a food hygiene rating of five in its latest inspection, reflecting good standards and effective practices in maintaining food safety.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3
