CareLens Cymru

Inspection evidence. Better care.

March 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-03-01 to 2026-03-31
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 64 homes across 22 authorities; 64 latest archived reports provide 559 source PDF pages.

64 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

64 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 20 specific rows: 0 Priority action and 20 Area for improvement. 0 rows are Achieved; 20 have unknown status.

2 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 3,581 extracted finding rows and 384 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

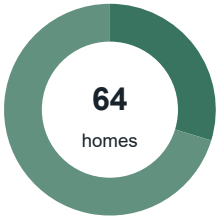

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

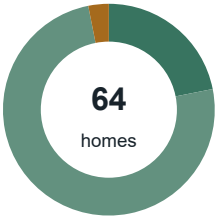

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

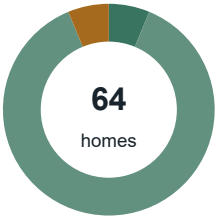

- Excellent 19 (30%)
- Good 45 (70%)

Care & support

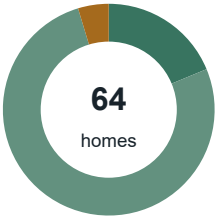

- Excellent 14 (22%)
- Good 48 (75%)
- Requires improv. 2 (3%)

Environment

- Excellent 4 (6%)
- Good 56 (88%)
- Requires improv. 4 (6%)

Leadership & management

- Excellent 12 (19%)
- Good 49 (77%)
- Requires improv. 3 (5%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	19	19/64
Well-being	Good	45	45/64
Care and Support	Excellent	14	14/64
Care and Support	Good	48	48/64
Care and Support	Requires Improvement	2	2/64
Environment	Excellent	4	4/64
Environment	Good	56	56/64
Environment	Requires Improvement	4	4/64
Leadership and Management	Excellent	12	12/64
Leadership and Management	Good	49	49/64
Leadership and Management	Requires Improvement	3	3/64

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	20

64 official summaries; 0 labelled theme extracts. 3,581 finding rows and 384 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 64. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	59	33	2	0	0
Safeguarding & incident learning	62	32	2	0	0
Personal plans & risk assessment	64	34	7	6	0
Staffing & recruitment	64	42	2	1	0
Training & supervision	62	39	5	4	0
Leadership & quality assurance	64	62	6	5	0
Rights, choice & independence	63	41	2	2	0
Nutrition & hydration	55	31	0	0	0
Infection prevention	61	42	0	1	0
Environment & fire safety	64	58	2	5	0
Welsh language & culture	64	1	7	0	0
Meaningful activity & community	64	52	3	1	0

Distinct reports mentioning each topic

Interpret the patterns

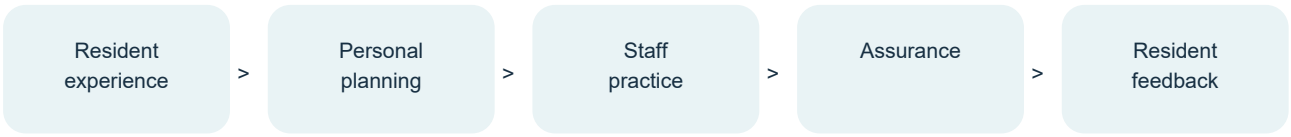

Personal plans & risk assessment: 6 reports have matching table rows; 7 have Improvement wording and 34 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Leadership & quality assurance: 5 reports have matching table rows; 6 have Improvement wording and 62 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 5 reports have matching table rows; 2 have Improvement wording and 58 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

CIW / Welsh Government | Crown copyright / Open Government Licence

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Personal plans & risk assessment

Reports / 64: mentions 64; Positive wording 34; Improvement wording 7; matching action rows 6; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Family members spoken with said “it’s a really good place, management and staff are great, I wouldn’t change a thing.” Daily care documentation is thorough and in depth and focusses on outcomes for people.

Churchstoke Short Stay | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Fire safety risk assessments and also arrangements need to improve to ensure the health and safety of people living at the service are identified and reduced so far as reasonably practicable.

Bethshan Sheltered Housing Association | PDF page 9 | Area for improvement | published status: Unknown | identified: 27/01/26 · Archived page · CIW source

Leadership & quality assurance

Reports / 64: mentions 64; Positive wording 62; Improvement wording 6; matching action rows 5; Priority category 0. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People receive exceptional care and support because the manager carries out highly effective pre- assessments, gathering detailed information from professionals and developing strong relationships with people.

Plas Garnedd Pentraeth | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> We identified a risk of poor outcomes for people as the quality of care reports do not contain analysis of the quality of care provided, this means there is not sufficient oversight to ensure the service is running smoothly.

Dolanog | PDF page 7 | Area for improvement | published status: Unknown | identified: 28/01/26 · Archived page · CIW source

Environment & fire safety

Reports / 64: mentions 64; Positive wording 58; Improvement wording 2; matching action rows 5; Priority category 0. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The building has been purposefully designed to create a bright, uplifting and vibrant atmosphere, and the consistently high standard of maintenance contributes to people feeling safe, valued and comfortable.

Cwmgelli Lodge Ltd | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> Fire safety risk assessments and also arrangements need to improve to ensure the health and safety of people living at the service are identified and reduced so far as reasonably practicable.

Bethshan Sheltered Housing Association | PDF page 9 | Area for improvement | published status: Unknown | identified: 27/01/26 · Archived page · CIW source

Training & supervision

Reports / 64: mentions 62; Positive wording 39; Improvement wording 5; matching action rows 4; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff receive regular supervision and appraisals in line with regulations and benefit from a stable environment, good staff benefits, and a well-established progression programme that supports retention and morale.

Palace Road | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People’s well□being outcomes may be at risk because staff may be delivering care without proven competence, safety checks, or the necessary skills to meet their needs safely and effectively.

Fairleigh House | PDF page 8 | Area for improvement | published status: Unknown | identified: 12/02/26 · Archived page · CIW source

Rights, choice & independence

Reports / 64: mentions 63; Positive wording 41; Improvement wording 2; matching action rows 2; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Routine checks—including fire safety systems, maintenance logs, cleaning schedules, and environmental audits confirm that facilities are kept to a high standard and support people's independence, safety, and comfort.

Mayflower Care Home | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People to experience choice and autonomy in their daily lives. People to have a access to a variety of meaningful activities and daily routines that reflect their wishes.

St Anne's Nursing Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 29/01/26 · Archived page · CIW source

Meaningful activity & community

Reports / 64: mentions 64; Positive wording 52; Improvement wording 3; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People receive exceptional care and support because the manager carries out highly effective pre- assessments, gathering detailed information from professionals and developing strong relationships with people.

Plas Garnedd Pentraeth | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People to experience choice and autonomy in their daily lives. People to have a access to a variety of meaningful activities and daily routines that reflect their wishes.

St Anne's Nursing Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 29/01/26 · Archived page · CIW source

Staffing & recruitment

Reports / 64: mentions 64; Positive wording 42; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We noted there has been minimal staff turnover since the last inspection, which is positive as it suggests the service is able to retain staff and provide consistent, continuous care.

Oaklands Care Home | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> Recruitment and staff deployment arrangements do not ensure that all individuals employed at the service are fit to work with people using the service. Staff files reviewed showed incomplete employment histories, missing or unchecked references, and required pre□employment checks not completed before staff started work. In addition, induction and competency assessments are not delivered consistently.

St Anne's Nursing Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 29/01/26 · Archived page · CIW source

Infection prevention

Reports / 64: mentions 61; Positive wording 42; Improvement wording 0; matching action rows 1; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Routine checks—including fire safety systems, maintenance logs, cleaning schedules, and environmental audits confirm that facilities are kept to a high standard and support people’s independence, safety, and comfort.

Mayflower Care Home | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

The provider must have effective risk assessments in place to ensure people at risks of falls are not able to access stairwells unsupervised. ensure people have access to bathing facilities that are in good working and cosmetic order to ensure infection control and prevention is robust and the risk to people is minimised.

Lyndell House Limited | PDF page 8 | Area for improvement | published status: Unknown | identified: 06/03/26 · Archived page · CIW source

Welsh language & culture

Reports / 64: mentions 64; Positive wording 1; Improvement wording 7; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

No representative excerpt passes the conservative wording rules. Consult the full source register; absence of an example is not absence of evidence.

Medicines management

Reports / 64: mentions 59; Positive wording 33; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The service has safe and well□structured medicines management systems, including accurate recording, secure storage of controlled drugs, routine audits, and clear processes for ordering, administration, and disposal.

Mayflower Care Home | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Improvements are required to strengthen arrangements for the disposal and destruction of medication, as current practices do not consistently demonstrate clear and complete audit trails.

Cwmcelyn Nursing Home | PDF page 5 · Archived page · CIW source

Safeguarding & incident learning

Reports / 64: mentions 62; Positive wording 32; Improvement wording 2; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We reviewed training records and found staff complete mandatory training in a number of areas including dementia awareness, moving and handling, positive behaviour support, safeguarding, and medication.

Walshaw House | PDF page 7 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Personal plans do not always contain accurate or current information, and updates are not consistently completed following important events such as changes in health, hospital admissions, or safeguarding concerns.

St Anne's Nursing Home | PDF page 5 · Archived page · CIW source

Nutrition & hydration

Reports / 64: mentions 55; Positive wording 31; Improvement wording 0; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Wellbeing is good because people experience good quality care; they have choice and control about their meals and what activities they partake in and enjoy engaging with people from the community both inside and outside the home.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3

CIW Crown-material copyright and reuse permission
