CareLens Cymru

Inspection evidence. Better care.

April 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-04-01 to 2026-04-30
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 56 homes across 16 authorities; 56 latest archived reports provide 497 source PDF pages.

56 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

56 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 11 specific rows: 0 Priority action and 11 Area for improvement. 0 rows are Achieved; 11 have unknown status.

1 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 3,135 extracted finding rows and 336 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

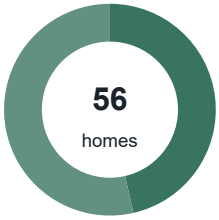

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

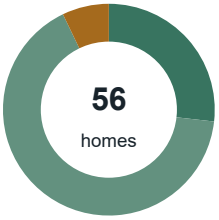

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

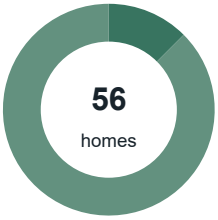

- Excellent 26 (46%)
- Good 30 (54%)

Care & support

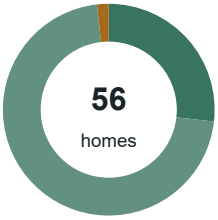

- Excellent 15 (27%)
- Good 37 (66%)
- Requires improv. 4 (7%)

Environment

- Excellent 7 (12%)
- Good 49 (88%)

Leadership & management

- Excellent 15 (27%)
- Good 40 (71%)
- Requires improv. 1 (2%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	26	26/56
Well-being	Good	30	30/56
Care and Support	Excellent	15	15/56
Care and Support	Good	37	37/56
Care and Support	Requires Improvement	4	4/56
Environment	Excellent	7	7/56
Environment	Good	49	49/56
Leadership and Management	Excellent	15	15/56
Leadership and Management	Good	40	40/56
Leadership and Management	Requires Improvement	1	1/56

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	11

56 official summaries; 0 labelled theme extracts. 3,135 finding rows and 336 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 56. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	51	29	3	0	0
Safeguarding & incident learning	55	38	0	0	0
Personal plans & risk assessment	55	20	5	4	0
Staffing & recruitment	54	40	0	1	0
Training & supervision	56	39	3	3	0
Leadership & quality assurance	56	55	4	3	0
Rights, choice & independence	55	37	2	0	0
Nutrition & hydration	53	34	2	1	0
Infection prevention	52	42	2	1	0
Environment & fire safety	56	55	2	3	0
Welsh language & culture	56	1	9	0	0
Meaningful activity & community	56	45	4	0	0

Distinct reports mentioning each topic

Interpret the patterns

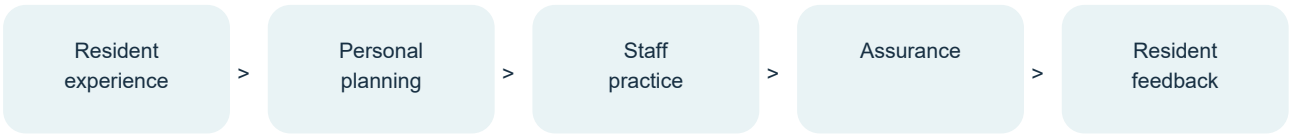

Personal plans & risk assessment: 4 reports have matching table rows; 5 have Improvement wording and 20 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Leadership & quality assurance: 3 reports have matching table rows; 4 have Improvement wording and 55 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Training & supervision: 3 reports have matching table rows; 3 have Improvement wording and 39 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

CIW / Welsh Government | Crown copyright / Open Government Licence

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Personal plans & risk assessment

Reports / 56: mentions 55; Positive wording 20; Improvement wording 5; matching action rows 4; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Personal plans include good quality “about me” information, clear outcomes, and detailed accounts of what matters to each person, demonstrating active involvement in their assessment and care.

Martello House | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be sure that care workers understand the support required to help them achieve their personal outcomes because care plans do not always contain sufficient/consistent information.

Gibraltar House | PDF page 8 | Area for improvement | published status: Unknown | identified: 01/09/22 · Archived page · CIW source

Leadership & quality assurance

Reports / 56: mentions 56; Positive wording 55; Improvement wording 4; matching action rows 3; Priority category 0. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The home is clean, safe and well organised, supported by robust health and safety systems and regular maintenance checks evidenced through monthly audits, repair logs, and routine servicing of key equipment.

Martello House | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People receive care that meets their needs, but the provider’s oversight of staff training lacks sufficient rigor to ensure staff possess the necessary skills for their roles and the requirements of the statement of purpose.

Emral House Nursing Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 30/03/23 · Archived page · CIW source

Training & supervision

Reports / 56: mentions 56; Positive wording 39; Improvement wording 3; matching action rows 3; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff receive regular supervision and annual appraisal that are used effectively to reflect on practice, review performance and agree development goals, and staff achievements and commitment are recognised.

Pool Cottage | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People receive care that meets their needs, but the provider’s oversight of staff training lacks sufficient rigor to ensure staff possess the necessary skills for their roles and the requirements of the statement of purpose.

Emral House Nursing Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 30/03/23 · Archived page · CIW source

Environment & fire safety

Reports / 56: mentions 56; Positive wording 55; Improvement wording 2; matching action rows 3; Priority category 0. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The home is clean, safe and well organised, supported by robust health and safety systems and regular maintenance checks evidenced through monthly audits, repair logs, and routine servicing of key equipment.

Martello House | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because the service provider has not sufficiently ensured standards of hygiene and infection control in the delivery of the service are maintained and systems to monitor levels of cleanliness and to take action were insufficient.

Woodside House Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 02/03/26 · Archived page · CIW source

Infection prevention

Reports / 56: mentions 52; Positive wording 42; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff consistently adhere to Public Health Wales guidance, with appropriate use of personal protective equipment (PPE), effective cleaning regimes and well-organised laundry and waste management systems.

Oakhill | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because the service provider has not sufficiently ensured standards of hygiene and infection control in the delivery of the service are maintained and systems to monitor levels of cleanliness and to take action were insufficient.

Woodside House Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 02/03/26 · Archived page · CIW source

Nutrition & hydration

Reports / 56: mentions 53; Positive wording 34; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Equipment, such as wheelchairs and pressure cushions, is well maintained, and individuals with specialist dietary requirements, receive safe and appropriate meals prepared and stored in line with guidance.

52 Narberth Road | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

We identified a risk to people's health and safety due to a breach of regulation 21(2). Support plans and risk assessments must contain accurate up to date information so that staff can provide appropriate care and support. In addition systems for monitoring food/fluid intake need to be suitably robust and completed consistently.

Glamorgan Care Ltd, Danygraig House | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/03/26 · Archived page · CIW source

Staffing & recruitment

Reports / 56: mentions 54; Positive wording 40; Improvement wording 0; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care staff receive thorough and relevant training, recruitment practices are robust, and the service is underpinned by strong governance arrangements that promote effective oversight and smooth day-to-day operation.

Pen Y Fai House | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> Gaps in supervision, appraisal, and training compliance increase the risk that staff lack the support, oversight, and skills needed to deliver safe and effective care. Ongoing staffing pressures mean staff feel that their ability to deliver care and wellbeing outcomes to a high standard are being impacted, which could increase the risk of unmet needs and poorer outcomes for individuals in the future.

Ty Cila | PDF page 8 | Area for improvement | published status: Unknown | identified: 11/02/26 · Archived page · CIW source

Welsh language & culture

Reports / 56: mentions 56; Positive wording 1; Improvement wording 9; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People are asked about their language preferences, and care staff show a positive and inclusive approach to incorporating Welsh into everyday practice where this supports people’s well□being.

Rosendale Park Care Home | PDF page 4 · Archived page · CIW source

Meaningful activity & community

Reports / 56: mentions 56; Positive wording 45; Improvement wording 4; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff told us they feel well supported, managers are approachable, and recent changes, such as adjustments to rotas and activity timetables, have been made in the best interests of people using the service.

Brynawel House Alcohol and Drug Rehabilitation Centre Ltd | PDF page 9 · Archived page · CIW source

Weakness prevention: direct improvement wording

> People's personal history, cultural identity, protected characteristics, and significant relationships are usually captured within assessments, but this information is not always carried through into care plans.

Gibraltar House | PDF page 5 · Archived page · CIW source

Medicines management

Reports / 56: mentions 51; Positive wording 29; Improvement wording 3; matching action rows 0; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The service has a robust risk assessment process and medication management policy in place, with the nursing team providing appropriate oversight to ensure medicines are managed safely and in line with individual risk assessments.

Brynawel House Alcohol and Drug Rehabilitation Centre Ltd | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> When observing one person's medication being given to them, we saw the tablets had been prepared earlier but we were told this was because the person was not ready for the tablets at that time.

Neyland House Care Home | PDF page 4 · Archived page · CIW source

Rights, choice & independence

Reports / 56: mentions 55; Positive wording 37; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff told us they feel well supported, managers are approachable, and recent changes, such as adjustments to rotas and activity timetables, have been made in the best interests of people using the service.

Brynawel House Alcohol and Drug Rehabilitation Centre Ltd | PDF page 9 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Although people reported feeling safe and spoke positively about staff, food, and choice, daily care recording is inconsistent, with gaps that do not always demonstrate timely or effective care delivery.

Moorland Home | PDF page 2 · Archived page · CIW source

Safeguarding & incident learning

Reports / 56: mentions 55; Positive wording 38; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The inspection findings support this, noting robust safeguarding arrangements, staff awareness of reporting responsibilities, and a secure environment where risks are identified and managed effectively.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3
