CareLens Cymru

Inspection evidence. Better care.

May 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-05-01 to 2026-05-31
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 51 homes across 19 authorities; 51 latest archived reports provide 477 source PDF pages.

51 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

51 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 34 specific rows: 4 Priority action and 30 Area for improvement. 0 rows are Achieved; 34 have unknown status.

8 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 2,887 extracted finding rows and 306 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

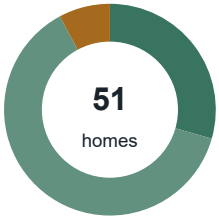

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

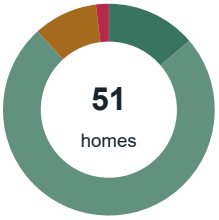

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

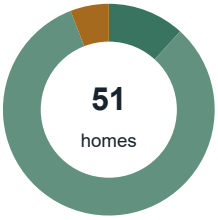

- Excellent 15 (29%)
- Good 32 (63%)
- Requires improv. 4 (8%)

Care & support

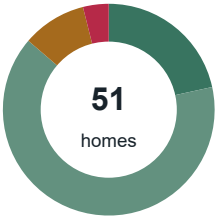

- Excellent 7 (14%)
- Good 38 (75%)
- Requires improv. 5 (10%)
- Significant improv. 1 (2%)

Environment

- Excellent 6 (12%)
- Good 42 (82%)
- Requires improv. 3 (6%)

Leadership
& management

- Excellent 11 (22%)
- Good 33 (65%)
- Requires improv. 5 (10%)
- Significant improv. 2 (4%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	15	15/51
Well-being	Good	32	32/51
Well-being	Requires Improvement	4	4/51
Care and Support	Excellent	7	7/51
Care and Support	Good	38	38/51
Care and Support	Requires Improvement	5	5/51
Care and Support	Requires Significant Improvement	1	1/51
Environment	Excellent	6	6/51
Environment	Good	42	42/51
Environment	Requires Improvement	3	3/51
Leadership and Management	Excellent	11	11/51
Leadership and Management	Good	33	33/51
Leadership and Management	Requires Improvement	5	5/51
Leadership and Management	Requires Significant Improvement	2	2/51

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	34

51 official summaries; 0 labelled theme extracts. 2,887 finding rows and 306 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 51. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	47	27	3	0	0
Safeguarding & incident learning	47	26	4	2	1
Personal plans & risk assessment	50	23	9	7	0
Staffing & recruitment	50	34	2	1	0
Training & supervision	51	27	4	3	1
Leadership & quality assurance	51	50	10	10	2
Rights, choice & independence	50	32	5	4	0
Nutrition & hydration	45	28	1	0	0
Infection prevention	47	33	2	0	0
Environment & fire safety	51	50	8	5	0
Welsh language & culture	51	2	6	0	0
Meaningful activity & community	51	44	1	2	0

Distinct reports mentioning each topic

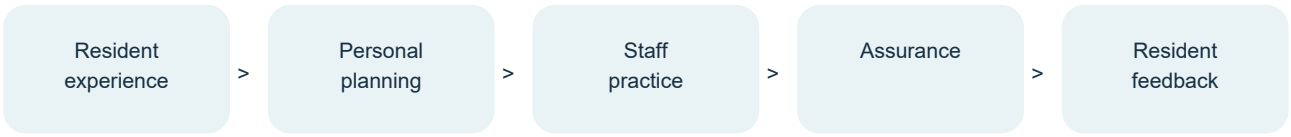

Interpret the patterns

Leadership & quality assurance: 10 reports have matching table rows; 10 have Improvement wording and 50 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Personal plans & risk assessment: 7 reports have matching table rows; 9 have Improvement wording and 23 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 5 reports have matching table rows; 8 have Improvement wording and 50 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Leadership & quality assurance

Reports / 51: mentions 51; Positive wording 50; Improvement wording 10; matching action rows 10; Priority category 2. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Family members echoed this reassurance, describing communication with the manager as “really good” and “fantastic, she’s down to earth, welcoming” expressing confidence and strong trust in the leadership team.

Llys Fechan Care Home | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be confident systems are in place to ensure they are provided with the opportunity to fully meet their wellbeing outcomes. The RI must ensure there is a detailed review of the service.

Bron Haul Care Home | PDF page 8 | Priority action | published status: Unknown | identified: 30/11/23 · Archived page · CIW source

Personal plans & risk assessment

Reports / 51: mentions 50; Positive wording 23; Improvement wording 9; matching action rows 7; Priority category 0. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The home provides meaningful, person-centred activities, that people spoke positively of, and detailed activity care plans demonstrate a strong understanding of what matters to individuals and what brings them enjoyment.

Aston Hall Care Limited | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be sure that care workers understand the support required to help them achieve their personal outcomes because care plans do not always contain sufficient/consistent information.

Parade House Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 16/03/26 · Archived page · CIW source

Environment & fire safety

Reports / 51: mentions 51; Positive wording 50; Improvement wording 8; matching action rows 5; Priority category 0. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People live in an environment with highly effective and well-maintained facilities and equipment to help them achieve their well-being outcomes whilst identifying, mitigating and reducing health and safety risks.

Rose Cross | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People are living in an environment that is not kept maintained and there are hazards that will pose a significant risk to people.

Bellavista Care Cardiff Limited | PDF page 8 | Area for improvement | published status: Unknown | identified: 10/12/24 · Archived page · CIW source

Rights, choice & independence

Reports / 51: mentions 50; Positive wording 32; Improvement wording 5; matching action rows 4; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Where people experience distress or behaviours that may challenge, staff use positive behaviour support strategies and effective de-escalation techniques, safeguarding people’s dignity and the well-being of others.

Heathfield Lodge Ltd | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People's liberty may be deprived without the necessary authorisations in place to support best interests decisions made around people's accommodation and care and support needs.

Campion Gardens Care Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 17/03/26 · Archived page · CIW source

Training & supervision

Reports / 51: mentions 51; Positive wording 27; Improvement wording 4; matching action rows 3; Priority category 1. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> All staff show a good level of knowledge to support their practice, confirming the quality of learning opportunities provided through the internal training coordinator and access to accredited external trainers.

Romilly Nursing Home | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider must ensure all staff receive annual appraisals in line with regulatory requirements. This must be implemented to ensure staff have meaningful opportunities to discuss performance, professional growth and development, and to support continuous improvement in care delivery.

Claremont Court Care Home Ltd | PDF page 9 | Area for improvement | published status: Unknown | identified: 24/07/24 · Archived page · CIW source

Safeguarding & incident learning

Reports / 51: mentions 47; Positive wording 26; Improvement wording 4; matching action rows 2; Priority category 1. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care and support is good as planning is person-centred and responsive, families are actively involved, and safeguarding, medication and infection-prevention arrangements support people’s safety and well-being.

No 1 Belle Vue | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> Employee fire safety training must be suitable and sufficient to safeguard people living, working and visiting the service.

Castle View | PDF page 9 | Area for improvement | published status: Unknown | identified: 31/03/26 · Archived page · CIW source

Meaningful activity & community

Reports / 51: mentions 51; Positive wording 44; Improvement wording 1; matching action rows 2; Priority category 0.
Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One relative shared, “They decorated the home and we were able to have mum’s 90th birthday party here.” Another person told us, “The carers take me to the park,” highlighting positive access to the community.

Romilly Nursing Home | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured there is effective day to day leadership of the service, in the absence of a manager registered with Social Care Wales. People cannot be assured of the arrangements for managing a complaint submitted to the service. People of what processes will be undertaken following the submission of a complaint.

Parade House Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 16/03/26 · Archived page · CIW source

Staffing & recruitment

Reports / 51: mentions 50; Positive wording 34; Improvement wording 2; matching action rows 1; Priority category 0.
Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The service benefits from strengthened governance arrangements, a more robust induction process for new care workers which contributes to the leadership and management theme being rated as good.

Mayflower Care Home | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

Outcomes for people require improvement because staffing pressures have reduced people's access to meaningful engagement and activities. People’s choices have been restricted, and care provided has not consistently aligned with their personal outcomes. Care documentation needs be streamlined and updated, to guide staff and fully involve people or their representatives in decisions about their care.

The Ivy | PDF page 10 | Area for improvement | published status: Unknown | identified: 26/02/26 · Archived page · CIW source

Welsh language & culture

Reports / 51: mentions 51; Positive wording 2; Improvement wording 6; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> These plans support staff to deliver good quality care that respects people's wishes, including cultural and language preferences such as Welsh language provision.

Pen Y Bryn Care Home | PDF page 4 · Archived page · CIW source

Medicines management

Reports / 51: mentions 47; Positive wording 27; Improvement wording 3; matching action rows 0; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care and support is good as planning is person-centred and responsive, families are actively involved, and safeguarding, medication and infection-prevention arrangements support people's safety and well-being.

No 1 Belle Vue | PDF page 2 · Archived page · CIW source

Weakness prevention: direct improvement wording

> However, some areas require improvement, such as inconsistent recording of PRN medication outcomes, which limits opportunities for effective review and oversight.

Caerau Manor | PDF page 5 · Archived page · CIW source

Infection prevention

Reports / 51: mentions 47; Positive wording 33; Improvement wording 2; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care and support is good as planning is person-centred and responsive, families are actively involved, and safeguarding, medication and infection-prevention arrangements support people's safety and well-being.

No 1 Belle Vue | PDF page 2 · Archived page · CIW source

Weakness prevention: direct improvement wording

> However, practice is not always consistent with the infection control policy, as we observed some staff did not remove their PPE promptly after care tasks had been completed.

Bron Haul Care Home | PDF page 5 · Archived page · CIW source

Nutrition & hydration

Reports / 51: mentions 45; Positive wording 28; Improvement wording 1; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People spoke positively about their experiences, with comments such as, "Staff are great" and "You can't fault the food." Relatives we spoke with expressed satisfaction with the care and support their family members receive.

Mayflower Care Home | PDF page 4 · Archived page · CIW source

Weakness prevention: direct improvement wording

> People's dietary and hydration needs are regularly observed but recording of people's fluid and diet intake requires improvement.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3
