CareLens Cymru

Inspection evidence. Better care.

June 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-06-01 to 2026-06-30
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 61 homes across 18 authorities; 61 latest archived reports provide 570 source PDF pages.

61 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

61 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 32 specific rows: 9 Priority action and 23 Area for improvement. 0 rows are Achieved; 32 have unknown status.

5 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 3,561 extracted finding rows and 366 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

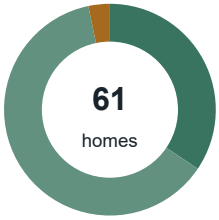

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

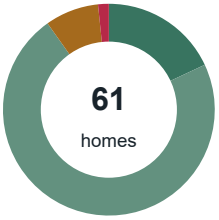

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

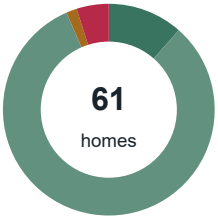

- Excellent 21 (34%)
- Good 38 (62%)
- Requires improv. 2 (3%)

Care & support

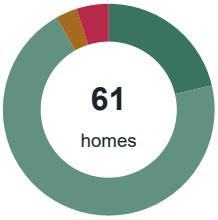

- Excellent 11 (18%)
- Good 44 (72%)
- Requires improv. 5 (8%)
- Significant improv. 1 (2%)

Environment

- Excellent 7 (11%)
- Good 50 (82%)
- Requires improv. 1 (2%)
- Significant improv. 3 (5%)

Leadership
& management

- Excellent 13 (21%)
- Good 43 (70%)
- Requires improv. 2 (3%)
- Significant improv. 3 (5%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	21	21/61
Well-being	Good	38	38/61
Well-being	Requires Improvement	2	2/61
Care and Support	Excellent	11	11/61
Care and Support	Good	44	44/61
Care and Support	Requires Improvement	5	5/61
Care and Support	Requires Significant Improvement	1	1/61
Environment	Excellent	7	7/61
Environment	Good	50	50/61
Environment	Requires Improvement	1	1/61
Environment	Requires Significant Improvement	3	3/61
Leadership and Management	Excellent	13	13/61
Leadership and Management	Good	43	43/61
Leadership and Management	Requires Improvement	2	2/61
Leadership and Management	Requires Significant Improvement	3	3/61

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	32

61 official summaries; 0 labelled theme extracts. 3,561 finding rows and 366 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 61. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	56	34	5	2	0
Safeguarding & incident learning	57	31	3	2	1
Personal plans & risk assessment	61	21	4	6	1
Staffing & recruitment	56	39	2	0	0
Training & supervision	60	41	1	3	0
Leadership & quality assurance	61	61	7	4	3
Rights, choice & independence	58	47	1	2	1
Nutrition & hydration	54	30	0	0	0
Infection prevention	56	43	1	0	0
Environment & fire safety	61	53	4	5	3
Welsh language & culture	61	0	10	0	0
Meaningful activity & community	61	48	3	3	1

Distinct reports mentioning each topic

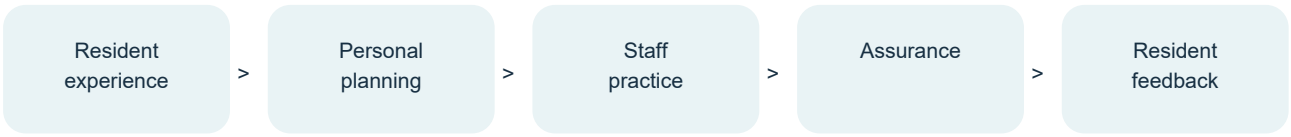

Interpret the patterns

Personal plans & risk assessment: 6 reports have matching table rows; 4 have Improvement wording and 21 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 5 reports have matching table rows; 4 have Improvement wording and 53 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Leadership & quality assurance: 4 reports have matching table rows; 7 have Improvement wording and 61 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Personal plans & risk assessment

Reports / 61: mentions 61; Positive wording 21; Improvement wording 4; matching action rows 6; Priority category 1. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> For people subject to Deprivation of Liberty Safeguards (DoLS) authorisations, care plans clearly reflect conditions and staff demonstrate a good understanding of their responsibilities.

Hazeldene | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People may not achieve their personal outcomes because personal plans and the review of these plans do not support the identification or monitoring of individuals' outcomes goals and aspirations.

Ty Derwen | PDF page 7 | Area for improvement | published status: Unknown | identified: 21/05/26 · Archived page · CIW source

Environment & fire safety

Reports / 61: mentions 61; Positive wording 53; Improvement wording 4; matching action rows 5; Priority category 3. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We received positive feedback from people's families saying the environment is pleasant, the diet offered to people is good, care staff are very welcoming, and overall, they are happy with their relative's care.

New Cranford EMI Care Home | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider has not ensured that all risks to the health and safety of individuals are identified and reduced so far as reasonably practicable. People's well-being is at risk if areas of health and safety are not addressed, and if systems are not in place to maintain adequate oversight of this.

Newton Care Home | PDF page 8 | Priority action | published status: Unknown | identified: 24/04/26 · Archived page · CIW source

Leadership & quality assurance

Reports / 61: mentions 61; Positive wording 61; Improvement wording 7; matching action rows 4; Priority category 3. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Leadership and management ensure robust systems are in place to monitor safety, maintenance and cleanliness, and care staff support people to use the environment in a way that promotes independence and choice.

Ty George | PDF page 9 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be certain the home is providing a safe, compliant and effective service that meets their wellbeing outcomes. A Quality of Care Review Report that meets the requirements of the regulations must be completed every six

Glascoed Ltd | PDF page 9 | Priority action | published status: Unknown | identified: 27/06/24 · Archived page · CIW source

Meaningful activity & community

Reports / 61: mentions 61; Positive wording 48; Improvement wording 3; matching action rows 3; Priority category 1. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The service supports people to have positive relationships, and we saw events have been held to bring people together in the home, and externally for events like bowling, trips to the garden centre and cinema trips.

Hallmark Penylan House Luxury Care Home | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Not all care staff are registered with the workforce regulator, Social Care Wales, therefore people's well-being may be impacted by having staff work who do not meet the requirements of being 'fit' to work at the service.

Newton Care Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 24/04/26 · Archived page · CIW source

Training & supervision

Reports / 61: mentions 60; Positive wording 41; Improvement wording 1; matching action rows 3; Priority category 0. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> She is very settled," and "I now have complete peace of mind." Care staff describe a positive, inclusive and supportive culture where supervision, appraisal and training arrangements are well established and meaningful.

Danesbrook House | PDF page 9 · Archived page · CIW source

Published table row: verify status and identified date

> People's well-being is at risk as staff are not provided with the training required to carry out their job safely. The service provider must ensure improvements are made in staff training compliance.

Ty Waunarlwydd | PDF page 7 | Area for improvement | published status: Unknown | identified: 20/05/26 · Archived page · CIW source

Medicines management

Reports / 61: mentions 56; Positive wording 34; Improvement wording 5; matching action rows 2; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Medication is safely managed, with robust systems in place including the use of Medication Administration Records (MAR) and clear PRN protocols outlining the reasons for administration and expected outcomes.

Ty Golff | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People may be at risk because ineffective systems do not ensure medicines are consistently stored, managed , overseen and administered safely.

Ty Derwen | PDF page 7 | Area for improvement | published status: Unknown | identified: 21/05/26 · Archived page · CIW source

Safeguarding & incident learning

Reports / 61: mentions 57; Positive wording 31; Improvement wording 3; matching action rows 2; Priority category 1. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Very high standards of care, everyone is friendly and approachable.” Robust recruitment and vetting processes are in place, supporting the safeguarding of individuals and ensuring staff are suitable to work within the service.

Thomas Gabrielle General Nursing & Dementia Residential Home | PDF page 9 · Archived page · CIW source

Published table row: verify status and identified date

> Notifications to CIW have not always been made consistently, and those that have, have been subject to significant delays. People's well-being may be impacted where the regulator is not notified of events at the service, impacting on regulatory oversight of the service.

Newton Care Home | PDF page 7 | Area for improvement | published status: Unknown | identified: 24/04/26 · Archived page · CIW source

Rights, choice & independence

Reports / 61: mentions 58; Positive wording 47; Improvement wording 1; matching action rows 2; Priority category 1. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Wellbeing outcomes for people are excellent as they experience consistent, person-centred care that promotes well-being, independence and safety, resulting in positive outcomes for people living at the service.

Hazeldene | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> The condition of internal communal and private spaces does not consistently support people’s comfort, dignity or independence. A robust plan, including how tasks will be prioritised and proposed dates for completion of actions such as repairing, redecorating and renewing parts of the environment is required.

Glascoed Ltd | PDF page 9 | Priority action | published status: Unknown | identified: 15/04/26 · Archived page · CIW source

Welsh language & culture

Reports / 61: mentions 61; Positive wording 0; Improvement wording 10; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

No representative excerpt passes the conservative wording rules. Consult the full source register; absence of an example is not absence of evidence.

Staffing & recruitment

Reports / 61: mentions 56; Positive wording 39; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Established staff demonstrated good compliance with mandatory training and showed competence in delivering care, while systems are in place to support new staff through induction and supervision.

St Brelades | PDF page 8 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Staffing arrangements, particularly nurse deployment, do not always align with the Statement of Purpose, indicating a need for review to ensure safe and effective care.

Hallmark Penylan House Luxury Care Home | PDF page 7 · Archived page · CIW source

Infection prevention

Reports / 61: mentions 56; Positive wording 43; Improvement wording 1; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Leadership and management ensure robust systems are in place to monitor safety, maintenance and cleanliness, and care staff support people to use the environment in a way that promotes independence and choice.

Ty George | PDF page 9 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Laundry storage arrangements do not consistently support effective infection prevention, as bedding and towels are stored in an unsuitable external area.

Newton Care Home | PDF page 5 · Archived page · CIW source

Nutrition & hydration

Reports / 61: mentions 54; Positive wording 30; Improvement wording 0; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We received positive feedback from people’s families saying the environment is pleasant, the diet offered to people is good, care staff are very welcoming, and overall, they are happy with their relative’s care.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3

CIW Crown-material copyright and reuse permission
