CareLens Cymru

Inspection evidence. Better care.

July 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-07-01 to 2026-07-31
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 73 homes across 20 authorities; 73 latest archived reports provide 689 source PDF pages.

73 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

73 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 38 specific rows: 8 Priority action and 30 Area for improvement. 0 rows are Achieved; 38 have unknown status.

3 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 4,269 extracted finding rows and 438 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

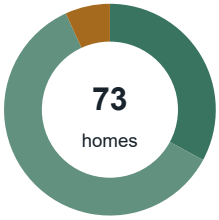

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

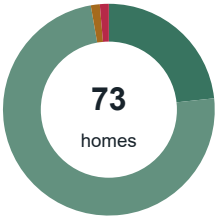

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

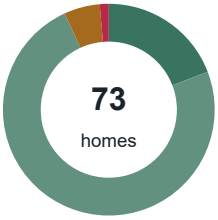

- Excellent 24 (33%)
- Good 44 (60%)
- Requires improv. 5 (7%)

Care & support

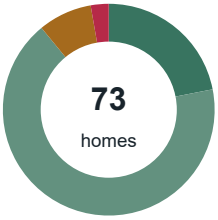

- Excellent 17 (23%)
- Good 54 (74%)
- Requires improv. 1 (1%)
- Significant improv. 1 (1%)

Environment

- Excellent 14 (19%)
- Good 54 (74%)
- Requires improv. 4 (5%)
- Significant improv. 1 (1%)

Leadership
& management

- Excellent 16 (22%)
- Good 49 (67%)
- Requires improv. 6 (8%)
- Significant improv. 2 (3%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	24	24/73
Well-being	Good	44	44/73
Well-being	Requires Improvement	5	5/73
Care and Support	Excellent	17	17/73
Care and Support	Good	54	54/73
Care and Support	Requires Improvement	1	1/73
Care and Support	Requires Significant Improvement	1	1/73
Environment	Excellent	14	14/73
Environment	Good	54	54/73
Environment	Requires Improvement	4	4/73
Environment	Requires Significant Improvement	1	1/73
Leadership and Management	Excellent	16	16/73
Leadership and Management	Good	49	49/73
Leadership and Management	Requires Improvement	6	6/73
Leadership and Management	Requires Significant Improvement	2	2/73

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	38

73 official summaries; 0 labelled theme extracts. 4,269 finding rows and 438 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 73. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	68	40	3	2	0
Safeguarding & incident learning	69	38	4	4	0
Personal plans & risk assessment	72	28	9	7	0
Staffing & recruitment	68	45	5	0	0
Training & supervision	72	47	4	6	2
Leadership & quality assurance	73	73	13	10	2
Rights, choice & independence	73	48	6	8	1
Nutrition & hydration	58	31	1	1	0
Infection prevention	62	53	2	1	0
Environment & fire safety	73	71	10	9	1
Welsh language & culture	73	3	6	0	0
Meaningful activity & community	73	62	6	1	0

Distinct reports mentioning each topic

Interpret the patterns

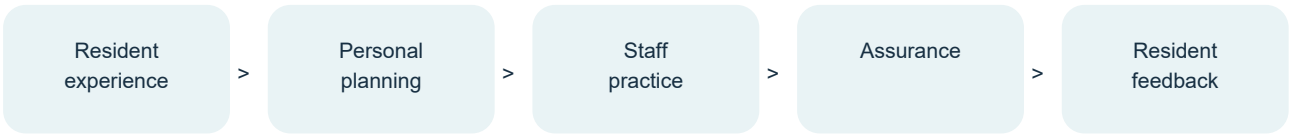

Leadership & quality assurance: 10 reports have matching table rows; 13 have Improvement wording and 73 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 9 reports have matching table rows; 10 have Improvement wording and 71 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Rights, choice & independence: 8 reports have matching table rows; 6 have Improvement wording and 48 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

CIW / Welsh Government | Crown copyright / Open Government Licence

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Leadership & quality assurance

Reports / 73: mentions 73; Positive wording 73; Improvement wording 13; matching action rows 10; Priority category 2. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The quiet lounge, sensory garden and courtyard have been enhanced following feedback from people, and the RI (responsible individual in charge of the service) reviews whether changes have had a positive impact.

Orme View Residential Care | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because incidents are not always appropriately escalated or thoroughly investigated, and governance systems do not consistently ensure robust oversight and follow-up.

Elidyr Communities Trust | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/06/26 · Archived page · CIW source

Environment & fire safety

Reports / 73: mentions 73; Positive wording 71; Improvement wording 10; matching action rows 9; Priority category 1. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We saw examples of the service celebrating different cultural backgrounds and creating opportunities for people and staff to share and learn from each other, contributing to a positive and inclusive environment.

Elidyr Communities Trust | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> We did not identify any impact on people due to a breach of regulation 58(1). However, there is a moderate risk to people's health and safety if medication is not stored and administered in line with regulation and best practice guidance.

The Laurels Residential Care Ltd | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/06/26 · Archived page · CIW source

Rights, choice & independence

Reports / 73: mentions 73; Positive wording 48; Improvement wording 6; matching action rows 8; Priority category 1.
Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We observed a particularly positive interaction between a care worker and a person they were supporting, where the staff member used pictorial communication aids to ensure the person had as much choice as possible.

Ashgrove | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> People may not achieve positive outcomes because the building and environment are not well maintained, and the environment is not consistently clean or safe. Improvements are required to ensure the premises support residents' well-being and dignity.

Cherry Tree Care Home Limited | PDF page 7 | Area for improvement | published status: Unknown | identified: 26/11/25 · Archived page · CIW source

Personal plans & risk assessment

Reports / 73: mentions 72; Positive wording 28; Improvement wording 9; matching action rows 7; Priority category 0.
Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Everyone is so happy – we are cared for in a very good way." People are consulted about their care and are given opportunities to decide how involved they wish to be in developing and reviewing their personal plans.

Marine Court Psychiatric Unit Limited | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider should ensure that changes to care and support needs are updated promptly within personal plans to ensure records remain accurate, current, professional, and accessible to staff (every 3 months).

Maes Teg | PDF page 8 | Area for improvement | published status: Unknown | identified: 29/11/22 · Archived page · CIW source

Training & supervision

Reports / 73: mentions 72; Positive wording 47; Improvement wording 4; matching action rows 6; Priority category 2. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Care staff reported the training provided is of a good standard, and training records reviewed indicate most staff are up to date with mandatory training requirements and hold a recognised qualification in health and social care.

Breaksea Care Home | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People are not necessarily supported by staff who are appropriately supervised or provided with training appropriate to their role. no impact identified during inspection however there is a potential impact form this.

Ty Iscoed | PDF page 8 | Area for improvement | published status: Unknown | identified: 24/03/22 · Archived page · CIW source

Safeguarding & incident learning

Reports / 73: mentions 69; Positive wording 38; Improvement wording 4; matching action rows 4; Priority category 0. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People told us “‘my choices are respected’” and “‘the staff do listen to me.’” People are safe and protected from abuse and neglect, with robust systems in place to promote safeguarding and wellbeing.

Queens Care Home | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because incidents are not always appropriately escalated or thoroughly investigated, and governance systems do not consistently ensure robust oversight and follow-up.

Elidyr Communities Trust | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/06/26 · Archived page · CIW source

Medicines management

Reports / 73: mentions 68; Positive wording 40; Improvement wording 3; matching action rows 2; Priority category 0. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> There are robust systems in place for safeguarding, medication management and infection prevention and control, alongside effective partnership working with external professionals to support people's

Gelli Mor | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> We did not identify any impact on people due to a breach of regulation 58(1). However, there is a moderate risk to people's health and safety if medication is not stored and administered in line with regulation and best practice guidance.

The Laurels Residential Care Ltd | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/06/26 · Archived page · CIW source

Meaningful activity & community

Reports / 73: mentions 73; Positive wording 62; Improvement wording 6; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff rotas demonstrated consistency, with reduced reliance on agency staff, supporting stability, continuity of care and the development of positive relationships between people and those who support them.

Priory Mount Eveswell | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

Outcomes for people require improvement because records demonstrate that people do not consistently access community-based activities identified as important to their well-being, independence and personal development, or those outlined in the provider's Statement of Purpose. Records relating to incidents and periods of distress do not consistently capture people's views, experience or emotional well-being.

Oaklands | PDF page 8 | Area for improvement | published status: Unknown | identified: 02/07/26 · Archived page · CIW source

Infection prevention

Reports / 73: mentions 62; Positive wording 53; Improvement wording 2; matching action rows 1; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Robust oversight arrangements have been established, ensuring staff consistently follow current infection control guidance and staff use personal protective equipment (PPE) to minimise the risk of cross contamination.

Annedd | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> The provider is non-compliant to regulation 44 (g) (h) of The Regulated Services (Service Providers and Responsible Individuals) (Wales) Regulations 2017. This is because of combustible materials stored together in the laundry/ basement area of the home which require improved storage to mitigate risks as far as is practicable, under health and safety regulations and fire safety guidance. Improvements to the kitchen have not been fully realised to meet food hygiene legislation.

Towyn Capel Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/04/26 · Archived page · CIW source

Nutrition & hydration

Reports / 73: mentions 58; Positive wording 31; Improvement wording 1; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Daily records and our observations show people receive a varied diet with regular drinks and snacks, and some monitoring systems, such as nutrition, demonstrate effective oversight of care delivery.

Rickeston Mill Care Home | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

The provider is non-compliant to regulation 44 (g) (h) of The Regulated Services (Service Providers and Responsible Individuals) (Wales) Regulations 2017. This is because of combustible materials stored together in the laundry/ basement area of the home which require improved storage to mitigate risks as far as is practicable, under health and safety regulations and fire safety guidance. Improvements to the kitchen have not been fully realised to meet food hygiene legislation.

Towyn Capel Residential Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/04/26 · Archived page · CIW source

Welsh language & culture

Reports / 73: mentions 73; Positive wording 3; Improvement wording 6; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Relatives confirmed the importance of this, stating “they make an effort to communicate with him in Welsh, they realise it’s important.” We saw warm, positive interactions between care staff and people, including attentive listening and reassurance.

The Rookery | PDF page 4 · Archived page · CIW source

Staffing & recruitment

Reports / 73: mentions 68; Positive wording 45; Improvement wording 5; matching action rows 0; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff rotas demonstrated consistency, with reduced reliance on agency staff, supporting stability, continuity of care and the development of positive relationships between people and those who support them.

Priory Mount Eveswell | PDF page 7 · Archived page · CIW source

Weakness prevention: direct improvement wording

> All staff must provide appropriate identification documents as well as complete a Disclosure and Barring Service (DBS) check, provide satisfactory references and full employment history.

Beacon Lodge | PDF page 6 · Archived page · CIW source

Source register: navigation, not a data dump

All 73 cohort records, including all 73 archived report summaries, are retained in the companion standalone HTML and report-library.json. The HTML register gives publication, issue and visit dates, exact summary kind, summary pages and individual source links. This PDF retains representative source-page links rather than a hundreds-page summary appendix.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3

CIW Crown-material copyright and reuse permission
