CareLens Cymru

Inspection evidence. Better care.

August 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-08-01 to 2026-08-31
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 48 homes across 20 authorities; 48 latest archived reports provide 457 source PDF pages.

48 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

48 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 23 specific rows: 5 Priority action and 18 Area for improvement. 0 rows are Achieved; 23 have unknown status.

4 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 2,885 extracted finding rows and 288 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

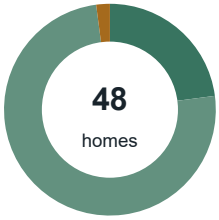

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

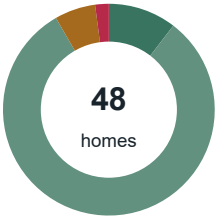

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

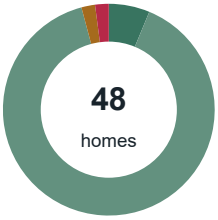

- Excellent 11 (23%)
- Good 36 (75%)
- Requires improv. 1 (2%)

Care & support

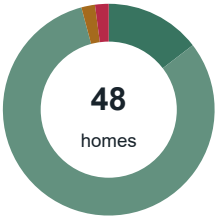

- Excellent 5 (10%)
- Good 39 (81%)
- Requires improv. 3 (6%)
- Significant improv. 1 (2%)

Environment

- Excellent 3 (6%)
- Good 43 (90%)
- Requires improv. 1 (2%)
- Significant improv. 1 (2%)

Leadership
& management

- Excellent 7 (15%)
- Good 39 (81%)
- Requires improv. 1 (2%)
- Significant improv. 1 (2%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	11	11/48
Well-being	Good	36	36/48
Well-being	Requires Improvement	1	1/48
Care and Support	Excellent	5	5/48
Care and Support	Good	39	39/48
Care and Support	Requires Improvement	3	3/48
Care and Support	Requires Significant Improvement	1	1/48
Environment	Excellent	3	3/48
Environment	Good	43	43/48
Environment	Requires Improvement	1	1/48
Environment	Requires Significant Improvement	1	1/48
Leadership and Management	Excellent	7	7/48
Leadership and Management	Good	39	39/48
Leadership and Management	Requires Improvement	1	1/48
Leadership and Management	Requires Significant Improvement	1	1/48

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	23

48 official summaries; 0 labelled theme extracts. 2,885 finding rows and 288 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 48. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	45	26	3	1	1
Safeguarding & incident learning	48	29	1	1	1
Personal plans & risk assessment	47	27	7	5	1
Staffing & recruitment	44	27	4	2	0
Training & supervision	48	34	4	2	1
Leadership & quality assurance	48	48	4	4	1
Rights, choice & independence	47	41	2	0	0
Nutrition & hydration	40	19	0	0	0
Infection prevention	40	28	0	0	0
Environment & fire safety	48	45	6	4	1
Welsh language & culture	48	1	11	0	0
Meaningful activity & community	48	43	6	3	0

Distinct reports mentioning each topic

Interpret the patterns

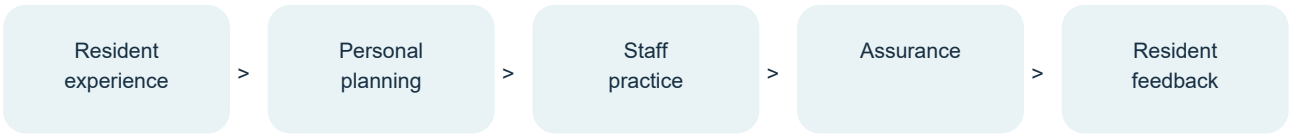

Personal plans & risk assessment: 5 reports have matching table rows; 7 have Improvement wording and 27 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 4 reports have matching table rows; 6 have Improvement wording and 45 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Leadership & quality assurance: 4 reports have matching table rows; 4 have Improvement wording and 48 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

CIW / Welsh Government | Crown copyright / Open Government Licence

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Personal plans & risk assessment

Reports / 48: mentions 47; Positive wording 27; Improvement wording 7; matching action rows 5; Priority category 1. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Risk assessments take a proportionate approach to positive risk management, enabling people to maintain as much independence and control as possible whilst ensuring their safety and wellbeing remain protected.

Glencourt | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured that their support is planned in a person-centred way, as personal plans do not consistently reflect their individual outcomes, preferences and what mattered to them.

Crick Care Home | PDF page 10 | Area for improvement | published status: Unknown | identified: 23/07/26 · Archived page · CIW source

Environment & fire safety

Reports / 48: mentions 48; Positive wording 45; Improvement wording 6; matching action rows 4; Priority category 1. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Continued investment in the home, together with effective maintenance and safety arrangements, ensures people live in an environment that positively supports their quality of life and day-to-day experiences.

The Old Manse | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> Young people's well-being is significantly impacted because they are living in an environment that is poorly maintained, contains environmental hazards and does not consistently provide a safe, comfortable and homely place to live.

Cartref Mynydd | PDF page 11 | Priority action | published status: Unknown | identified: 04/08/26 · Archived page · CIW source

Leadership & quality assurance

Reports / 48: mentions 48; Positive wording 48; Improvement wording 4; matching action rows 4; Priority category 1. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Safeguarding records demonstrated appropriate action, partnership working and oversight, while visiting professionals spoke positively about safeguarding practice, risk management and multidisciplinary working.

EMJ & GP Ltd TA Park View Care Home | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> People may not always experience fully personalised care because personal outcomes, activity provision and quality assurance systems are not yet consistently evaluated to demonstrate the impact support has on their well-being.

Chilton Place | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/07/26 · Archived page · CIW source

Meaningful activity & community

Reports / 48: mentions 48; Positive wording 43; Improvement wording 6; matching action rows 3; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The appointment of a well-being co-ordinator has increased opportunities for engagement and community involvement, helping people to enjoy positive experiences and achieve outcomes that are important to them.

Llys Gwyn House Limited | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

People may not always experience fully personalised care because personal outcomes, activity provision and quality assurance systems are not yet consistently evaluated to demonstrate the impact support has on their well-being.

Chilton Place | PDF page 8 | Area for improvement | published status: Unknown | identified: 03/07/26 · Archived page · CIW source

Staffing & recruitment

Reports / 48: mentions 44; Positive wording 27; Improvement wording 4; matching action rows 2; Priority category 0. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Effective governance systems will enable managers to quickly demonstrate compliance with regulatory requirements, including professional registration, DBS monitoring and workforce development arrangements.

Torestin Care Home | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People's outcomes may not be met if staffing levels are not adequate and staff are not consistent and suitably trained to provide the required support.

Rotherslade House | PDF page 7 | Area for improvement | published status: Unknown | identified: 14/05/26 · Archived page · CIW source

Training & supervision

Reports / 48: mentions 48; Positive wording 34; Improvement wording 4; matching action rows 2; Priority category 1. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> We reviewed training records and found staff complete mandatory training in several areas including dementia awareness, moving and handling, positive behaviour support, safeguarding, and medication.

Sandford | PDF page 7 · Archived page · CIW source

Published table row: verify status and identified date

> People cannot be assured their care and support needs are consistently met, as staff had not received regular training, supervision and support to enable them to carry out their roles effectively and safely.

Crick Care Home | PDF page 10 | Area for improvement | published status: Unknown | identified: 23/07/26 · Archived page · CIW source

Medicines management

Reports / 48: mentions 45; Positive wording 26; Improvement wording 3; matching action rows 1; Priority category 1. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Strengths included personalised care planning, effective healthcare engagement, strong safeguarding arrangements, robust medication management and positive outcomes reported by relatives and professionals.

EMJ & GP Ltd TA Park View Care Home | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> The current arrangements for managing medicines place people at risk of not receiving the right medication at the right time, and increases the likelihood of medication related incidents. The provider must ensure that medication storage, recording, training and auditing is in line with regulations, best practice guidance, and their own medication policy.

Stanley Villa | PDF page 8 | Priority action | published status: Unknown | identified: 03/06/26 · Archived page · CIW source

Safeguarding & incident learning

Reports / 48: mentions 48; Positive wording 29; Improvement wording 1; matching action rows 1; Priority category 1. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Safeguarding records demonstrated appropriate action, partnership working and oversight, while visiting professionals spoke positively about safeguarding practice, risk management and multidisciplinary working.

EMJ & GP Ltd TA Park View Care Home | PDF page 5 · Archived page · CIW source

The current arrangements for managing medicines place people at risk of not receiving the right medication at the right time, and increases the likelihood of medication related incidents. The provider must ensure that medication storage, recording, training and auditing is in line with regulations, best practice guidance, and their own medication policy.

Stanley Villa | PDF page 8 | Priority action | published status: Unknown | identified: 03/06/26 · Archived page · CIW source

Welsh language & culture

Reports / 48: mentions 48; Positive wording 1; Improvement wording 11; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> One person told us, “I’m happy here, they’re all lovely.” Relatives also spoke positively about the relationships between staff and residents, commenting, “All the regular staff they know her well.” The home promotes and maintains open communication with families, with one relative telling us, “Any little hiccup at all we will get a phone call, they’re very good I think.” The service promotes the Welsh language through an active offer approach, with Welsh-speaking managers and staff available, bilingual signage throughout the home and information available in Welsh on request.

Llys Gwyn House Limited | PDF page 4 · Archived page · CIW source

Rights, choice & independence

Reports / 48: mentions 47; Positive wording 41; Improvement wording 2; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People were positive about the support they receive and we observed individuals being consistently encouraged to make choices in line with their preferences, including decisions about meals, drinks and snacks.

College Fields Nursing Home | PDF page 4 · Archived page · CIW source

Weakness prevention: direct improvement wording

> In addition to this the area for waiting for and administering medication is not always suitable for people to have privacy and medication administered with dignity.

Rotherslade House | PDF page 5 · Archived page · CIW source

Infection prevention

Reports / 48: mentions 40; Positive wording 28; Improvement wording 0; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Sandford has been awarded a score of five by the Food Standards Agency, the highest score available which suggests standards of cleanliness and hygiene in the kitchen are very good.

Sandford | PDF page 6 · Archived page · CIW source

Nutrition & hydration

Reports / 48: mentions 40; Positive wording 19; Improvement wording 0; matching action rows 0; Priority category 0.
Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People were positive about the support they receive and we observed individuals being consistently encouraged to make choices in line with their preferences, including decisions about meals, drinks and snacks.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3
