CareLens Cymru

Inspection evidence. Better care.

September 2026 publication-month manager learning report

Independent manager learning | source: CIW / Welsh Government

Publication period: 2026-09-01 to 2026-09-30
Snapshot: 2026-11-01
Fixed all-data period cohort; latest archived reports only.

The fixed cohort contains 71 homes across 19 authorities; 71 latest archived reports provide 709 source PDF pages.

71 reports have official CIW summaries and 0 have explicitly labelled theme extracts. 0 cohort homes have no archived report.

71 homes have at least one published theme rating and 0 have none. The four theme distributions retain missing values and use the full cohort denominator.

Published tables contain 37 specific rows: 15 Priority action and 22 Area for improvement. 0 rows are Achieved; 37 have unknown status.

7 specific action rows have no topic assignment and remain included in the whole-cohort row totals; topic charts must not be treated as a complete action inventory.

All 4,168 extracted finding rows and 426 sections inform the evidence map. Positive and Improvement wording counts are separate overlapping search-label cohorts.

How to use this report

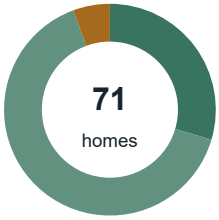

Read the cohort and limitations first. Use the topic evidence to recognise positive practice and prevent weaknesses; test suitability in your own home. Do not treat search labels or historical action rows as present-day judgements.

Open the complete companion HTML source register and all official summaries

Coverage and exact published ratings

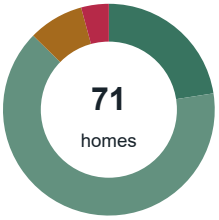

The rating denominator is all homes in this fixed cohort. Not published is explicit. Snapshot rating dates are not guaranteed to align with report publication dates.

Well-being

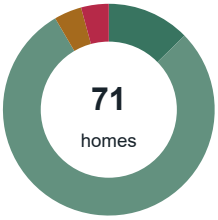

- Excellent 21 (30%)
- Good 46 (65%)
- Requires improv. 4 (6%)

Care & support

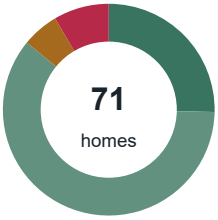

- Excellent 16 (23%)
- Good 46 (65%)
- Requires improv. 6 (8%)
- Significant improv. 3 (4%)

Environment

- Excellent 9 (13%)
- Good 56 (79%)
- Requires improv. 3 (4%)
- Significant improv. 3 (4%)

Leadership
& management

- Excellent 18 (25%)
- Good 43 (61%)
- Requires improv. 4 (6%)
- Significant improv. 6 (8%)

Theme	Published rating	Homes	Denominator
Well-being	Excellent	21	21/71
Well-being	Good	46	46/71
Well-being	Requires Improvement	4	4/71
Care and Support	Excellent	16	16/71
Care and Support	Good	46	46/71
Care and Support	Requires Improvement	6	6/71
Care and Support	Requires Significant Improvement	3	3/71
Environment	Excellent	9	9/71
Environment	Good	56	56/71
Environment	Requires Improvement	3	3/71
Environment	Requires Significant Improvement	3	3/71
Leadership and Management	Excellent	18	18/71
Leadership and Management	Good	43	43/71
Leadership and Management	Requires Improvement	4	4/71
Leadership and Management	Requires Significant Improvement	6	6/71

Action-table status

Source status, not present-day failures. Unknown means no status was captured; Achieved remains historical.

Published status	Specific rows
Unknown	37

71 official summaries; 0 labelled theme extracts. 4,168 finding rows and 426 sections were considered.

Evidence map: mentions, not deficiencies

All counts are distinct report-bearing homes / 71. Positive and Improvement wording are automated search-label sets. Action columns count homes with matching non-none published rows; historical and achieved rows remain included. Sets overlap.

Topic	Mention	Positive	Improvement wording	Action	Priority
Medicines management	66	40	6	4	2
Safeguarding & incident learning	63	38	3	2	2
Personal plans & risk assessment	69	40	12	7	2
Staffing & recruitment	63	31	4	4	2
Training & supervision	69	48	8	5	2
Leadership & quality assurance	71	71	18	10	6
Rights, choice & independence	71	53	5	1	1
Nutrition & hydration	59	35	5	1	1
Infection prevention	60	40	3	0	0
Environment & fire safety	71	67	9	7	4
Welsh language & culture	71	3	7	0	0
Meaningful activity & community	71	60	3	1	0

Distinct reports mentioning each topic

Interpret the patterns

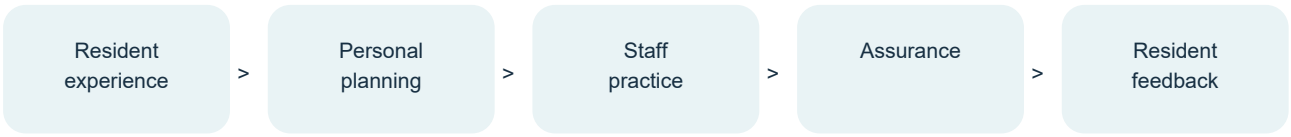

Leadership & quality assurance: 10 reports have matching table rows; 18 have Improvement wording and 71 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Personal plans & risk assessment: 7 reports have matching table rows; 12 have Improvement wording and 40 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

Environment & fire safety: 7 reports have matching table rows; 9 have Improvement wording and 67 have Positive wording. Use the source context and local testing, not a league table or an assumption of widespread failure.

CIW / Welsh Government | Crown copyright / Open Government Licence

A practical implementation sequence

Illustrative assistant learning workflow; not an official CIW framework.

Week 1 — understand and test

Ask residents what matters. Read representative positive and issue evidence with the relevant lead. Sample current records and observe practice. Identify applicable local gaps, separating historical/achieved source rows from current local concerns.

By day 30 — trial and verify

Trial a small agreed change with a named owner and review date. Define success using the listed assurance records, direct observation and resident feedback. Record exceptions and unintended consequences; adapt good practice rather than simply copy it.

By day 90 — sustain and listen

Repeat the same checks to verify the control remains effective. Ask residents and staff whether experience improved. Retain effective changes, revise ineffective ones and bring persistent local gaps to oversight.

Success is not a completed checklist alone. Triangulate records, observed staff practice and people's experience. These are assistant-suggested learning prompts, not new legal duties or clinical instructions.

Leadership & quality assurance

Reports / 71: mentions 71; Positive wording 71; Improvement wording 18; matching action rows 10; Priority category 6. Overlapping search-label sets.

Review responsible-individual oversight and quality reviews. Track audit actions to closure and show how resident and relative feedback changes the service.

Local test: Trace an audit exception and resident feedback through ownership, action and recheck.
Outcome to verify: Oversight detects gaps and verifies improvements with records, observation and resident feedback.

Suggested owner: Responsible individual / manager
Evidence of success: RI visit records, quality reports, feedback and closed action log; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Comprehensive reviews of the quality of care and support bring together outcomes, audit findings and stakeholder views, helping leaders evaluate the effectiveness of the service and inform future developments.

Hallmark Greenhill Manor Luxury Care Home | PDF page 9 · Archived page · CIW source

Published table row: verify status and identified date

> The Responsible Individual must supervise the management of the service effectively to ensure it operates safely and promotes the best possible outcomes for people. The manager must be supported to run the service safely, particularly through periods of change.

Rhyd Hir | PDF page 8 | Area for improvement | published status: Unknown | identified: 27/07/26 · Archived page · CIW source

Personal plans & risk assessment

Reports / 71: mentions 69; Positive wording 40; Improvement wording 12; matching action rows 7; Priority category 2. Overlapping search-label sets.

Sample personal plans for individual preferences, changing needs, review dates and usable risk controls. Check that staff can apply the guidance in practice.

Local test: Compare sampled plans with current preferences, changing needs and observed care.
Outcome to verify: Plans are usable and consistent with the support people actually receive.

Suggested owner: Care lead
Evidence of success: Plan reviews, resident involvement and observed practice; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Personal plans contained detailed information about people's wishes, routines, life histories and desired outcomes, and staff demonstrated a good understanding of how to support people in line with these.

Elliots Hill Care Ltd - Elliots Hill RCH | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Outcomes for people require improvement because care plans, risk assessments and daily records do not always fully reflect people's current needs or clearly demonstrate the care and support provided.

Peniel Green Care Home | PDF page 11 | Area for improvement | published status: Unknown | identified: 07/07/26 · Archived page · CIW source

Environment & fire safety

Reports / 71: mentions 71; Positive wording 67; Improvement wording 9; matching action rows 7; Priority category 4. Overlapping search-label sets.

Review fire and premises safety, servicing, accessibility and environmental risks; verify outstanding maintenance actions and person-specific evacuation arrangements.

Local test: Walk the premises and trace sampled safety or maintenance exceptions to verification.
Outcome to verify: Identified hazards receive appropriate follow-up and checks reflect actual conditions.

Suggested owner: Estates lead / manager
Evidence of success: Safety checks, servicing, maintenance log and evacuation plans; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The provider has established robust systems to minimise infection risks, maintain the premises and equipment, and monitor safety, enabling people to achieve their outcomes in a homely and welcoming environment.

Celynbrook Care Home | PDF page 5 · Archived page · CIW source

Published table row: verify status and identified date

> The provider has not ensured effective arrangements are in place to identify and manage health and safety risks. This places people at risk of harm and does not promote or maintain their safety and wellbeing.

Brigadoon Care Home | PDF page 8 | Priority action | published status: Unknown | identified: 30/06/26 · Archived page · CIW source

Training & supervision

Reports / 71: mentions 69; Positive wording 48; Improvement wording 8; matching action rows 5; Priority category 2. Overlapping search-label sets.

Reconcile the training matrix with current roles and residents' needs. Sample supervision records and assess competence, rather than attendance alone.

Local test: Ask staff to demonstrate a role-relevant skill and compare supervision evidence.
Outcome to verify: Competence is demonstrated in practice rather than inferred from attendance records alone.

Suggested owner: Training lead
Evidence of success: Training matrix, competency assessment and supervision records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> This is because there are good security measures to prevent unauthorised access to the home and its grounds; staff know their responsibilities in relation to safeguarding and they have completed training in safeguarding.

Dol Y Felin | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> People's well-being is at risk as nursing staff are not provided with the support and supervision required to carry out their job safely. The service provider must ensure nurses receive meaningful supervision and appraisal within regulatory timeframes which are reflective and developmental.

Y Plas EMI Care Home | PDF page 8 | Area for improvement | published status: Unknown | identified: 30/10/25 · Archived page · CIW source

Medicines management

Reports / 71: mentions 66; Positive wording 40; Improvement wording 6; matching action rows 4; Priority category 2. Overlapping search-label sets.

Audit medicine administration records, storage, reconciliation, PRN protocols and staff competency; document exceptions and follow-up.

Local test: Sample administration records against actual staff practice with the medicines lead.
Outcome to verify: Exceptions are detected, followed up and checked; staff demonstrate the agreed local procedure.

Suggested owner: Clinical lead / medicines lead
Evidence of success: MAR audit, competency records, storage checks and documented corrective actions; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Staff have access to a wide range of mandatory and specialist training, including safeguarding, medication management, mental health, learning disability awareness, positive behaviour support, dysphagia and epilepsy training.

Swn Y Wylan | PDF page 6 · Archived page · CIW source

Published table row: verify status and identified date

> People are at risk of harm as medication is not always managed safely. The provider must ensure medication is managed and administered safely in line with national guidance and the service's policy.

Y Plas EMI Care Home | PDF page 8 | Priority action | published status: Unknown | identified: 30/10/25 · Archived page · CIW source

Staffing & recruitment

Reports / 71: mentions 63; Positive wording 31; Improvement wording 4; matching action rows 4; Priority category 2. Overlapping search-label sets.

Review staffing against actual dependency and safe recruitment checks. Examine continuity, induction and the impact of vacancies or agency use.

Local test: Compare recent rotas and induction checks with actual support needs and continuity.
Outcome to verify: The agreed staffing arrangements work in observed practice; identified gaps receive follow-up.

Suggested owner: Registered manager / HR
Evidence of success: Dependency reviews, rota analysis and recruitment checks; cross-check against observed practice and resident feedback.

Positive practice to adapt

> Quality assurance processes, workforce development opportunities and recruitment practices contribute to a positive culture focused on delivering safe, consistent care and positive outcomes for people.

Bevan College | PDF page 3 · Archived page · CIW source

Published table row: verify status and identified date

> The service provider has failed to demonstrate all people receive the right care, at the right time from appropriately recruited, trained, skilled, competent and supervised staff.

St Albans Nursing Home | PDF page 12 | Priority action | published status: Unknown | identified: 28/07/26 · Archived page · CIW source

Safeguarding & incident learning

Reports / 71: mentions 63; Positive wording 38; Improvement wording 3; matching action rows 2; Priority category 2. Overlapping search-label sets.

Review safeguarding escalation, incident reporting and CIW notifications. Check that staff understand local procedures and that learning reaches the team.

Local test: Walk through a local escalation scenario and trace a recent incident review.
Outcome to verify: Staff explain escalation confidently and can show how incident learning changed practice.

Suggested owner: Registered manager
Evidence of success: Escalation log, training records, incident reviews and notifications; cross-check against observed practice and resident feedback.

Positive practice to adapt

> This is because there are good security measures to prevent unauthorised access to the home and its grounds; staff know their responsibilities in relation to safeguarding and they have completed training in safeguarding.

Dol Y Felin | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

> Risks relating to nutrition, weight loss, falls, safeguarding and the environment were not consistently identified, monitored, analysed or addressed, resulting in people not always receiving a service that promotes choice, independence, wellbeing and safety.

Priory House Care Home | PDF page 10 | Priority action | published status: Unknown | identified: 07/07/26 · Archived page · CIW source

Nutrition & hydration

Reports / 71: mentions 59; Positive wording 35; Improvement wording 5; matching action rows 1; Priority category 1. Overlapping search-label sets.

Review nutritional and hydration risks, weight trends, meal preferences and escalation when needs change; assess the dining experience with residents.

Local test: Observe a meal and compare preferences, monitoring records and escalation arrangements.
Outcome to verify: People describe a suitable dining experience and changing needs receive documented follow-up.

Suggested owner: Care lead / catering lead
Evidence of success: Risk screening, monitoring, referrals and resident feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The service holds a Food Standards Agency food hygiene rating of 5, indicating very good standards of food hygiene People benefit from effective arrangements for the maintenance of the environment and equipment.

Peniel Green Care Home | PDF page 8 · Archived page · CIW source

Published table row: verify status and identified date

Risks relating to nutrition, weight loss, falls, safeguarding and the environment were not consistently identified, monitored, analysed or addressed, resulting in people not always receiving a service that promotes choice, independence, wellbeing and safety.

Priory House Care Home | PDF page 10 | Priority action | published status: Unknown | identified: 07/07/26 · Archived page · CIW source

Rights, choice & independence

Reports / 71: mentions 71; Positive wording 53; Improvement wording 5; matching action rows 1; Priority category 1. Overlapping search-label sets.

Check consent and decision-making records, legal authorisations where applicable, and how daily practice supports choice, dignity and independence.

Local test: Observe daily choices and compare decision records with what people describe.
Outcome to verify: People's choices are respected in practice and applicable decision records remain coherent.

Suggested owner: Care lead
Evidence of success: Decision records, authorisations and resident-led goals; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People have choice and control over their daily lives and are supported to make decisions about what they want to do, enabling them to prioritise the things that matter most to them and achieve positive outcomes.

Beach Court Care Home | PDF page 2 · Archived page · CIW source

Published table row: verify status and identified date

> Risks relating to nutrition, weight loss, falls, safeguarding and the environment were not consistently identified, monitored, analysed or addressed, resulting in people not always receiving a service that promotes choice, independence, wellbeing and safety.

Priory House Care Home | PDF page 10 | Priority action | published status: Unknown | identified: 07/07/26 · Archived page · CIW source

Meaningful activity & community

Reports / 71: mentions 71; Positive wording 60; Improvement wording 3; matching action rows 1; Priority category 0. Overlapping search-label sets.

Review opportunities for personally meaningful activity, relationships and community participation, using resident outcomes rather than activity counts alone.

Local test: Discuss meaningful goals with residents and compare participation records with experience.
Outcome to verify: People describe opportunities that matter to them and feedback shapes future support.

Suggested owner: Well-being lead
Evidence of success: Resident goals, participation records and feedback; cross-check against observed practice and resident feedback.

Positive practice to adapt

> People experience good well-being outcomes because care staff know them well and support them to maintain important relationships, access their local community and pursue interests that are important to them.

Perrots Lodge | PDF page 4 · Archived page · CIW source

Published table row: verify status and identified date

People do not always benefit from effective governance and oversight arrangements. Whilst quality assurance systems were in place, several issues relating to activities provision, environmental maintenance and refurbishment works had been identified previously but remained unresolved at the time of inspection. This reduced our assurance that governance arrangements were consistently effective in driving improvement and ensuring actions were completed within reasonable timescales.

Ashton Park Care Home | PDF page 11 | Area for improvement | published status: Unknown | identified: 15/07/26 · Archived page · CIW source

Welsh language & culture

Reports / 71: mentions 71; Positive wording 3; Improvement wording 7; matching action rows 0; Priority category 0. Overlapping search-label sets.

Assess the Welsh language active offer and cultural needs proactively, including how preferences are identified and acted upon; do not equate no requests with adequate provision.

Local test: Ask how language preferences are identified and observe the active offer in practice.
Outcome to verify: People can access the agreed language and cultural support, not merely a recorded preference.

Suggested owner: Registered manager
Evidence of success: Language preferences, active-offer arrangements and accessible information; cross-check against observed practice and resident feedback.

Positive practice to adapt

> A positive approach was demonstrated towards the Welsh Active Offer.

Plas Gwyn Care Home | PDF page 6 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Welsh language provision was developing but not consistently evidenced through an active offer approach.

Mumbles Nursing Home | PDF page 2 · Archived page · CIW source

Infection prevention

Reports / 71: mentions 60; Positive wording 40; Improvement wording 3; matching action rows 0; Priority category 0. Overlapping search-label sets.

Check infection-control practice, cleaning assurance and staff competence. Follow up audit exceptions and verify that practical supplies and routines are effective.

Local test: Observe agreed cleaning and hygiene routines alongside the local audit evidence.
Outcome to verify: Routines work in practice and audit exceptions are corrected and rechecked.

Suggested owner: Infection prevention lead
Evidence of success: IPC audit, cleaning checks and competency records; cross-check against observed practice and resident feedback.

Positive practice to adapt

> The provider has established robust systems to minimise infection risks, maintain the premises and equipment, and monitor safety, enabling people to achieve their outcomes in a homely and welcoming environment.

Celynbrook Care Home | PDF page 5 · Archived page · CIW source

Weakness prevention: direct improvement wording

> Risks relating to nutrition, weight loss, falls, safeguarding, infection prevention and control, equipment safety, and environmental health and safety are not consistently identified, monitored, analysed, or addressed.

Method, attribution and limitations

This is a fixed all-data period cohort, not a dashboard-filter cohort. Only each service's latest archived report is included; this is not the complete historical inspection series or a trend in care quality. Early empty periods must not be interpreted as an absence of historical inspections: earlier reports are outside this latest-only archive.

Monthly membership uses reportPublishedActualDate, not the inspection visit or report issue date. Visit start/end, issue and publication are distinct. Empty months mean no latest archived report was published in that month, not that CIW did no inspections.

Ratings are the exact four published directory-snapshot theme values. Their effective dates are not independently auditable and cannot be assumed to match the historical publication month. Missing ratings and missing reports are not evidence of poor care. No overall quality score is calculated.

Positive wording and Improvement wording are automated search labels, not independent CIW findings. Topic counts mean reports mentioning a topic, not failures; topics and evidence sets overlap and must not be added together.

Published action-table rows can be historical or Achieved. New and Reviewed describe status words published in the source, not validation today. Missing status means unknown, not unresolved. Category counts are not counts of current failures or confirmed enforcement notices.

Excerpts and official summaries retain extracted wording and PDF page provenance. Layout changes and damaged characters can occur; the archived PDF is authoritative. Representative examples are not an exhaustive account or a prevalence estimate.

Public latest-report URLs can change after this snapshot. Use the linked local archived PDF to verify the captured evidence; the external source link establishes its CIW origin.

Management controls and the illustrative learning workflow are assistant-suggested local learning prompts, not CIW requirements, legal advice, clinical advice or an accreditation assessment. Validate applicability with appropriate local leads.

CareLens Cymru is independent and not an official CIW product. Source: Care Inspectorate Wales / Welsh Government, Crown copyright in each report's stated year; reuse under the Open Government Licence, excluding logos. 979 archived reports contain explicit licence notices. The Haven has no extracted notice; the general CIW copyright page provides Crown-material reuse permission. Source links and attribution are retained.

Method: deterministic aggregation of the full JSON findings, theme sections and specific action rows. Topic examples are conservatively selected exact extracted wording, preferring readable short passages from distinct homes. Positive examples exclude negative/qualification vocabulary; issue examples require direct negative or required-improvement wording. Generic enforcement boilerplate and contact-bearing/header excerpts are excluded. These selection rules change displayed examples, not the original search-label counts.

Open Government Licence v3

CIW Crown-material copyright and reuse permission
